The topic of Entrepreneurial Finance involves many issues, including but not limited to the risks and returns to being an entrepreneur, financial contracting, business planning, capital gaps and the availability of capital, market booms and busts, public policy and international differences in entrepreneurial finance

Access Free Entrepreneurial

stemming from
differences in laws,
institutions and culture.

As these issues are so
extremely broad and
complex, the academic
and practitioner literature
on topic usually focuses
on at most one or two of
these issues at one time.

The Oxford Handbook
of Entrepreneurial
Finance provides a
comprehensive picture of

issues dealing with
different sources of
entrepreneurial finance
and different issues with
financing entrepreneurs.

The Handbook
comprises contributions
from 48 authors based in
12 different countries. It
is organized into seven
parts, the first of which
introduces the issues,
explains the organization
of the Handbook, and

briefly summarizes the contributions made by the authors in each of the chapters. Part II covers the topics pertaining to financing new industries and the returns and risk to being an entrepreneur. Part III deals with entrepreneurial capital structure. Part IV discusses business planning, funding and funding gaps in

entrepreneurial finance with a focus on credit markets. Part V provides analyses of the main alternative sources of entrepreneurial finance. Part VI considers issues in public policy towards entrepreneurial finance. Part VII considers international differences in entrepreneurial finance, including analyses of

in weak institutional
environments as well as
microfinance.

This book covers topics
that are at the
intersection of business
ethics and governance as
they pertain to
entrepreneurship and
finance. It is the first
focused work that links
entrepreneurship and

Access Free Entrepreneurial

finance to governance and business ethics, rather than explore them separately. The chapters highlight with empirical data the strong interplay between ethics in organizational efficiency and financial activity, and the role of legal settings and governance in facilitating ethical standards. They discuss novel and timely topics,

particularly given the recent financial crisis and discussions on regulating ethical behaviour. This book will encourage future scholars to investigate the role of law and governance in mitigating corruption and facilitating integrity in entrepreneurship and finance.
