"The Smoke of London uncovers the origins of urban air pollution, two centuries before the industrial revolution. By 1600, London was a fossil-fueled city, its high-sulfur coal a basic necessity for the poor and a source of cheap energy for its growing manufacturing sector. The resulting smoke was found ugly and dangerous throughout the seventeenth and eighteenth centuries, leading to challenges in court, suppression by the crown, doctors' attempts to understand the nature of good air, increasing suburbanization, and changing representations of urban life in poetry and on the London stage. Neither a celebratory account of proto-environmentalism nor a declensionist narrative of degradation, The Smoke of London recovers the seriousness of pre-modern environmental concerns even as it explains their limits and failures. The impact of early retirement plans and career change on the professional and personal lives of professors and on the manpower and fiscal structures of the universities they serve is examined. The book is based on more than 50 accounts of academics who took early retirement options and a comprehensive review of incentive programs for early retirement, along with mid-career change programs. Chapter 1 explains why colleges and universities are interested in mid-career change and early retirement programs, and outlines the various options now available. Career options in industry, government, and academia are analyzed in chapter 2. Chapter 3 offers an analysis of the experiences of 70 of the first 100 or so persons who were induced to retire early, covering such topics as motivation, satisfaction with the decision, and ways that early retirement affected their well-being. Chapter 4 discusses the fiscal considerations involved in early retirement plans. Chapter 5 examines the manpower questions, including such questions as how incentive early-retirement plans will affect the age distribution of university and college faculties and whether early-retirement and mid-career change will modify age and talent distribution. Chapter 6 contains a discussion of the funding requirements and tax implications of increased-benefit retirement programs and an analysis of the legal aspects of age discrimination. The final chapter sketches the policy implications of mid-career change and early retirement, presents summary evaluation of the early-retirement schemes, and outlines a number of considerations for colleges, universities, and faculty members contemplating these options. In the final chapter several policy considerations are discussed, including: developing a mechanism for faculty review and evaluation; providing retirement and financial counseling; dissemination information about the options; and recognizing potential contributions from Emerkiti. Appendices include a guide to administrator interviews and a guide to early retiree interviews. (Author/LC)

In Victorian London, filth was everywhere: horse traffic filled the streets with dung, household rubbish went uncollected, cesspools brimmed with "night soil," graveyards teemed with rotting corpses, the air itself was choked with smoke. In this intimately visceral book, Lee Jackson guides us through the underbelly of the Victorian metropolis, introducing us to the men and women who struggled to stem a rising tide of pollution and dirt, and the forces that opposed them. Through thematic chapters, Jackson describes how Victorian reformers met with both triumph and disaster. Full of individual stories and overlooked details--from the dustmen who grew rich from recycling, to the peculiar history of the public toilet--this riveting book gives us a fresh insight into the minutiae of daily life and the wider challenges posed by the unprecedented growth of the Victorian capital.
