EU Administrative Governance

Policy implementation at EU level plays a prominent role in EU administrative governance despite the fact that since its very beginnings the E (EC) and later also the EU have been based on what has come to be referred to as 'executive federalism'9. Generally, Member States apply and enforce policies and law adopted at European level.

The European Union said today that it wants to work with US counterparts on a common approach to tech governance -- including pushing to standardize rules for applications of technologies like AI and pushing big tech to be more responsible for what their platforms amplify. EU lawmakers are anticipating rebooted transatlantic relations under the incoming administration of president-elect Joe Biden.

European Administrative Governance - Springer

'This book is a valuable compendium. . . provides a useful starting point for future studies on administrative leadership and administrative self-organization. . . ' - Paul W. Thurner, European Law Books This book is a unique contribution to the understanding of the reality of government and governance in the European Union (EU).

But European administrative law is a work under construction. This book helps to explore the current state of affairs. Thomas Gross, Common Market Law Review Drs Hofmann and T\u00fcrk made a name for themselves in the field of EU administrative law with their first collection of edited essays, EU Administrative Governance (Edward Elgar) 2006, which was well reviewed and made an important contribution to the subject. The focus of their new collection, Legal Challenges in EU Administrative Law, is accountability, internal through structures and procedures and external through courts and auditors. With its many useful contributions from well-known experts it promises well. Carol Harlow, London School of Economics, UK The move towards a system of integrated administration in the EU poses considerable legal challenges. This book explores ways in which accountability, legality, legitimacy and efficiency can be ensured in the multiple forms of co-operation of European and national administrations in the delivery of EU and EC policies. Examining the procedures and structures of European administrative integration, this innovative book will be a stimulating read for academics, researchers and both undergraduate and postgraduate students in European law.

Key chapters, written by leading experts across the field, engage with important ongoing debates in the field of EU administrative law, focusing on areas of topical interest such as financial markets, the growing security state and problematic common asylum procedures. In doing so, they provide a summary of what we know, don't know and ought to know about EU administrative law. Examining the control functions of administrative law and the machinery for accountability, this Research Handbook eloquently challenges areas of authoritarian governance, such as the Eurozone and security state, where control and accountability are weak and tackles the seemingly insoluble question of citizen 'voice' and access to policy-making.

"This fine team of academics moves beyond mere descriptions of capacities, structures and processes to explain the effectiveness of Civil Protection in the EU. With their exploration of trust as a key factor, they deliver the best book so far on this critical topic."—Arjen Boin, Leiden University, the Netherlands "Grounded in unique and voluminous fieldwork within the EU's nascent community of civil protection practitioners and mechanisms, this timely study shows us that interpersonal and professional trust rooted in collegiate relationships is pivotal for bridging the different policy styles embedded in member states' administrative cultures and building much-needed cohesive, effective and resilient European crisis management capacity. A gem for crisis management and EU scholars alike."—Paul 't Hart, Utrecht University and Netherlands School of Public Administration, the Netherlands The EU and its member states have committed themselves to the protection of their citizens, and a Europe that protects must be able to respond effectively when disaster strikes. Utilizing unique survey data and interviews in nineteen EU member states, this book treats civil protection and crisis management as crucial cases for investigating which factors—such as trust, public-administration culture, and public-administration structure—facilitate or hinder effective EU cooperation. In addition to investigating the main divides and unifying patterns of cooperation that exist among the EU member states, the authors combine knowledge from crisis management studies together with insights from public and social capital studies to examine to what extent so-called 'software factors', such as culture, trust, and norms, matter for achieving effective civil protection cooperation and crisis management.

This book is a unique contribution to the understanding of the reality of government and governance in the European Union.

Administrative Law and Policy of the EU provides a comprehensive analysis of the administration of the European Union and the legal framework within which that administration operates. The book examines the multifarious approaches, techniques, and structures of public administration in order to systematise and assess the solutions they offer to political, social, and economic problems. The legal framework of administration is examined from the standpoint of how it meets the demands of specific policy objectives established by democratically accountable decision-makers. Administrative law structures and many of its underlying principles have developed in an evolutionary and isolated manner in each policy area. While aware of the diversity of specific areas, this book takes an overarching approach, setting out the common rules and principles that constitute the general body of EU administrative law. By integrating the disciplines of political and administrative science, and administrative law, the book offers a rich explanation and critique of the complex executive framework of the EU.

Drawing on research from the administrative sciences and using organizational, institutional and decision-making theories, this volume examines the emerging bureaucratic framework of the EU and highlights that analyzing the patterns and dynamics of the EU's administrative capacities is essential to understand how it shapes European public policy.

This book explores the work of the European Ombudsman and her or his contribution to holding the EU institutions, bodies, offices and agencies to account, through examination of complaints on maladministration, own-initiative inquiries and other proactive efforts. It considers the Ombudsman's current institutional and constitutional position and her or his 'method' of dealing with complaints, and unravels the depth of subject matters that fall under the Ombudsman's remit. A separate chapter focuses on transparency and access to documents. The last part of the book critically reflects upon the present mandate and practice of the Ombudsman, and discusses a number of possible proposals for improvement. This work has interdisciplinary appeal and will engage scholars in law, political science and public administration, as well as EU and national policy-makers.

This book unites scholarship on law and politics with compliance research in the EU to shed light on the political role of a neglected dimension of litigation in the EU: the political role of governmental actions for annulment. The book does not portray national governments as passive actors within the EU's judicial arena. Instead it focuses on cases in which national governments turn to the Court of Justice to litigate against the European Commission, and provides several answers to the question of why EU member state governments take this decision. Governments hope, on the one hand, to evade costly domestic adjustments where the Commission uses administrative acts to interfere with domestic policy application. On the other hand, governments hope to provoke judicial law-making to influence the long-term development of EU administrative law and sectoral regulation. The book will be of particular interest to political scientists and legal scholars. .

This thesis aims at addressing the problem of a potential dis-embedding of the EU administration from democratic institutions. For that purpose it explores the potential of a novel approach to EU constitutionalism, namely of European conflicts-law to ensure the democratic legitimacy of EU administrative governance of GMOs. The term administrative governance is being used as referring to a system of administrative action, in which EU administrative actors implement EU law in cooperation with national administrations, as well as with scientific and private experts. In order to analyse the functioning of this system governance is employed as analytical framework. This thesis shows that the conflicts-law approach constitutes a valuable constitutional framework. It helps to identify and better understand the legitimacy problems of EU administrative governance in the field of GMOs. The existent legal rules in this area can to a certain extent be reconceived as embodying conflicts-law mechanisms and ideas. This is most visible in their aim to procedurally organise cooperation between various actors within horizontal network structures of decision-making. However, the implementation of GMO rules in practice has considerably undermined the functioning of conflicts-law mechanisms. The analysis reveals problematic shifts of authority, which go beyond the system of shared responsibility envisaged by the EU legislator. Instead of administrative cooperation between national and supranational actors, hierarchy in the sense of central decision-making by the Commission dominates the process. Moreover, instead of shared responsibility between public authorities and the biotech industry, the applicant has become a powerful player of GMO regulation. This has to some extent also undermined the application of the precautionary principle in this area. This thesis concludes that attempts of EU law to constitutionalise administrative governance of GMOs in a legitimate way have not proven to be successful so far. Finally, this thesis also reveals certain limitations of the conflicts-law approach. It is suggested that conflicts-law at present should not be considered as a fully-fledged theory of European integration. Its strength lies in the ability to re-direct the discussion on democratic legitimacy of EU law, and to offer constitutional ideas for further elaboration of regulatory solutions. However, further conceptual clarifications seem necessary in order to make it operational in concrete cases of EU regulation.
