Women often think that their risk of getting Ductal Carcinoma In Situ (DCIS) or Invasive Breast Cancer (IBC) is much higher than real numbers show. This fear is often fed by new stories about research, and sometimes by their own doctors. Many doctors and researchers say that DCIS is not Invasive Breast Cancer (IBC) because it stays in the breast duct. HOWEVER... DCIS is also called Stage 0 breast cancer, and is treated as if it were IBC. There are many dilemmas about DCIS, and this book tries to clear them up. We know how easy it is to end up more confused after looking at different websites, books, and research results. We present a new way to approach DCIS that combines the latest research with practical information. Even though we state things plainly, many scientific resources and references were used to make sure this book is accurate. Please be aware that those resources may use older language that we are learning is not accurate for DCIS. For example, DCIS lesions do not have the ability to "recur," even though this term is commonly used by many scientists and doctors. You will learn about DCIS and how it fits into breast diseases, including breast cancer. The process of getting diagnosed is also explained, as are the different types of treatments that are commonly given for DCIS. Risks are also explained clearly. This includes the risk of being diagnosed with DCIS, as well as the risk of getting another DCIS or a future Invasive Breast Cancer. This book also highlights the various kinds of ongoing research for DCIS. A list of terms, and additional resources and references are also included to help

This volume presents international perspectives on the application and development of theory and methodology in researching higher education. Topics discussed include critical race theory; the use of communities of practice theory; participant ethnography; and decolonization using indigenous principles.

This volume develops an encompassing view of questioning and discussion in a classroom setting, and enhances the understanding and practice of multidisciplinary research by including perspectives from various fields. Scholars join together in analysis over the same set of transcribed discussions from the perspectives of logic, sociolinguistics, philosophy, various branches of psychology, and various traditions within education research. The analyses cover all aspects of questioning and discussion. An appealing and distinctive feature of this book is its focus on actual empirical and easily accessible examples of classroom interaction. It thus grounds discussion whether practical or theoretical, with actual classroom practice.

This Second Edition of Diana Ridley 's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting

This collection offers empirical studies and theoretical essays about human communication in everyday life. The writings come from many of the world's leading researchers and cut across academic boundaries, engaging scholars and teachers from such disciplines as communication, sociology, anthropology, linguistics, and education. Chapters emphasize empirical, qualitative studies of people's everyday uses of talk-in-interaction, and they feature work in such areas as sociolinguistics, conversation analysis, discourse analysis, and ethnography. The volume is dedicated to and highlights themes in the work of the late Robert Hopper, an outstanding scholar in communication who pioneered research in Language and Social Interaction (LSI). The contributors examine various features of human interaction (such as laughter, vocal repetition, and hand gestures) occurring naturally within a variety of settings (at a dinner table, a doctor's office, an automotive repair shop, and so forth), whereby interlocutors accomplish aspects of their interpersonal or institutional lives (resolve a disagreement, report bad medical news, negotiate a raise, and more), all of

which may relate to larger social issues (including police brutality, human spirituality, death, and optimism). The chapters in this anthology show that social life is largely a communicative accomplishment and that people constitute the social realities experienced every day through small and subtle ways of communicating, carefully orchestrated but commonly taken for granted. In showcasing the diversity of contemporary LSI research, this volume is appropriate for scholars and graduate students in language and social interaction, communication, sociology, research methods, qualitative research methods, discourse analysis, conversation analysis, linguistics, and related areas.
