This book presents the reader with some of the earliest classic SF short stories – all of them published between 1858 and 1934, featuring both well-known and long-forgotten writers – dealing for the first time with topics to which science had (some) answers only at much later stages. This includes aspects of alien life forms, transmogrification, pandemics, life on Mars, android robots, big data, matter transmission and impact events to name but a few. The short stories are reprinted in full alongside extensive commentaries which also examine some of the latest scientific thinking surrounding the story's main theme and provide the reader with suggestions for further reading.

Exploring Science and Mathematics in a Child's World provides a cohesive discussion of how to make learning science and mathematics both valuable and enjoyable for young children. Part I chapters are foundational and help students understand child development, interrelated mathematics and science processes, and Concept Exploration design. Part II activity chapters uniquely help students gain a solid understanding of scientific topics, while they learn how to implement activities with children using constructivist and inquiry-based methods.

This book presents a collection of educational research and developmental efforts on the rapidly emerging use of infrared cameras and thermal imaging in science education. It provides an overview of infrared cameras in science education to date, and of the physics and technology of infrared imaging and thermography. It discusses different areas of application of infrared cameras in physics, chemistry and biology education, as well as empirical research on students' interaction with the technology. It ends with conclusions drawn from the contributions as a whole and a formulation of forward-looking comments.

A rich and stimulating learning experience - Exploring Science: Working Scientifically Student Books present Key Stage 3 Science in the series' own unique style - packed with extraordinary photos and incredible facts - encouraging all students to explore, and to learn Clear learning outcomes are provided for every page spread, ensuring students understand their own learning journey New Working Scientifically pages focus on the skills required by the National Curriculum and for progression to Key Stage 4, with particular focus on literacy
