The first novel based on the wildly popular role playing game EVE Online, EVE: The Emptyrean Age brings this compelling science fiction environment to life. A clone with no name or past awakens to a cruel existence, hunted mercilessly for crimes he may never know; yet he stands close to the pinnacle of power in New Eden. A disgraced ambassador is confronted by a mysterious woman who knows everything about him, and of the sinister plot against his government; his actions will one day unleash the vengeful wrath of an entire civilization. And among the downtrodden masses of a corporation-owned world, a man named Tibus Heth is about to launch a revolution that will change the course of history. The confluence of these dark events will lead humanity towards a tragic destiny. The transcendence of man to the dream of immortality has bred a quest for power like none before it; empires spanning across thousands of stars will clash in the depths of space and on the worlds within. Those who stand before the tides of war, willingly or not, must face the fundamental choices that have been with man for tens of thousands of years, unchanged since the memory of Earth was lost. This is EVE, The Emptyrean Age. A test of our convictions and the will to survive. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Assessing impact is increasingly critical to the survival of services: managers now require comprehensive information about effectiveness, especially in relation to users. Outlining a rigorously tested approach to library evaluation and offering practical tools and highly relevant examples, this book enables LIS managers to get to grips with the slippery concept of service impact and to address their own impact questions in their planning. The 2nd edition is fully updated to include international approaches to qualitative library evaluation, new international research, and current debates on the evolving nature of evaluation, as well as reflections on the importance of involving stakeholders and of evaluation to guide advocacy. Key topics include: • The demand for evidence • Getting to grips with impact • The research base of this work • Putting the impact into planning • Getting things clear: objectives • Success criteria and impact indicators: how you know you are making a difference • Making things happen: activities and process indicators • Thinking about evidence • Gathering and interpreting evidence • Taking stock, setting targets and development planning • Doing national or international evaluation • Where do we go from here? Readership: Practising library and information service managers and policy makers in the field. LIS policy shapers and managers in public, education (schools, further and higher education), health and special libraries and information services working in any country or internationally and people engaged in professional education in the field such as lecturers or students.

• A supplementary guide for students who are learning how to evaluate reports of empirical research published in academic journals. • Your students will learn the practical aspects of evaluating research, not just how to apply a laundry list of technical terms from their textbooks. • Each chapter is organized around evaluation questions. For each question, there is a concise explanation of how to apply it in the evaluation of research reports. • Numerous examples from journals in the social and behavioral sciences illustrate the application of the evaluation questions. Students see actual examples of strong and weak features of published reports. • Commonsense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class. • The structure of this book enables students to work with confidence while evaluating articles for homework. • Avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even though it has serious methodological flaws. Students learn when and why certain types of flaws may be tolerated. They learn why evaluation should not be performed mechanically. • This book received very high student evaluations when field-tested with students just beginning their study of research methods. • Contains more than 60 new examples from recently published research. In addition, minor changes have been made throughout for consistency with the latest edition of the Publication Manual of the American Psychological Association.

Role Play underpins all development and learning in young children. Practice Guidance for the Early Years Foundation Stage (2008, page 7). Learning through play is at the heart of the EYFS, and this series aims to give the practitioner as many play ideas as possible to support children's learning.
