The creative process refers to the sequence of thoughts and actions that are involved in the production of new work that is both original and valuable in its context. This book examines this process across the domains of visual art, writing, engineering, design and music. It characterizes each domain's creative process based on evidence stemming from

creators' accounts of their own activity and a wide-range of observational material and theories specific to each field. Results from empirical research are then presented across a set of closely linked chapters, using a common set of methodologies that seek to trace the creative process as it unfolds. This highly interdisciplinary edited collection offers valuable insight into the creative process for scholars and practitioners in the fields of psychology, education, and creative studies, as well as for any other readers interested in the creative process. Todd Lubart brings together a group of authors who are themselves actively involved in their respective creative fields and invites readers to adopt a broad perspective on the creative process in order to unravel some of its mysteries.

2004 the full story of the relationship between Albert Camus and Jean-Paul Sartre. Their dramatic rupture at the height of the Cold War, like that conflict itself, demanded those caught in its wake to take sides rather than to appreciate its tragic complexity. Now, using newly available sources, Ronald Aronson offers the first book-length account of the twentieth century's most famous friendship and its end. Albert Camus and Jean-Paul Sartre first met in 1943, during the German occupation of France. The two became fast friends. Intellectual as well as political allies, they grew famous overnight after Paris was liberated. As playwrights, novelists, philosophers, journalists, and editors, the two seemed to be everywhere and in command of every medium in post-war France. East-West tensions would put a strain on their friendship, however, as they evolved in opposing directions and

2004 began to disagree over philosophy, the responsibilities of intellectuals, and what sorts of political changes were necessary or possible. As Camus, then Sartre adopted the mantle of public spokesperson for his side, a historic showdown seemed inevitable. Sartre embraced violence as a path to change and Camus sharply opposed it, leading to a bitter and very public falling out in 1952. They never spoke again, although they continued to disagree, in code, until Camus's death in 1960. In a remarkably nuanced and balanced account, Aronson chronicles this riveting story while demonstrating how Camus and Sartre developed first in connection with and then against each other, each keeping the other in his sights long after their break. Combining biography and intellectual history, philosophical and political passion, Camus and Sartre will fascinate anyone interested

Original annotated and commented edition of the masterpiece of the mysterious Satoshi Nakamoto, inventor of Bitcoin, the digital currency on everyone's lips.

However, few noticed that the innovative power of Bitcoin is not strictly financial, but it fundamentally impacts the creation of political consensus, by transforming it into a technological mechanism. Exactly for this reason, the present edition is enriched by a critical apparatus that should make possible, even for the less tech-savvy reader, to comprehend and reflect on such a key phenomenon of our times.

moving psychological thriller that keeps you holding your breath” (Métro) Alice, a fierce and respected Parisian cop, wakes up on a Central Park bench with no memory of the night before, handcuffed to a complete stranger—a musician named Gabriel. Disoriented, dazed, and with someone else’s blood on her shirt, Alice works furiously to reconnect the dots. She remembers clubbing with her friends the night before on the Champs-Élysées. Gabriel claims he was playing a gig in Dublin. Was she drugged? Kidnapped? Why is the gun in her jacket pocket missing a bullet? And whose blood is on her clothes? Over the next twenty-four hours, Alice and Gabriel race across New York in search of answers, stumbling upon a startling set of clues that point to a terrible adversary from the past. Alice must finally confront her memories of hunting the serial killer who took
