Introduction. We issued an update in October 2007 on the FIDIC Conditions of Contract (pre-press edition) for Design, Build and Operate Projects (DBO Contract, or Gold Book). Following that update, we now examine the design related obligations assumed under the Gold Book. To recap, the Gold Book aims to build upon the advantages of the DBO procurement approach which combines design, construction and long-term operation and maintenance of a facility within a single entity (DBO Contractor).

May 2008 Projects - FIDIC

The long awaited FIDIC Design Build Operate Contract has finally been published by FIDIC. The purpose of this article is to provide readers with a general overview of the new build contract and its intended application. The use of FIDIC based agreements in the Gulf formed the subject of some of our articles in our Law Up Date published in 2007.

The new FIDIC Contract: Design Build Operate

DBO Contract is a similar form to the Silver Book. It was published to fulfil the need for a combination contract with design-build obligation and long-term operation commitment. In this DBO Contract, the contractor does not have any obligation about financing. So, the document is applicable for tenders that have an international basis.

Different FIDIC Contract documents- 07 most pioneering types

The DBO form of contract is based on the same structure and layout as the earlier (1999) documents published by FIDIC, with General Conditions, Particular Conditions and a variety of Sample Forms. It is based on a 20-clause layout and, where appropriate, it uses the same terminology and same definitions as are found in the 1999 documents.

FIDIC - Wikipedia

The Red Book: Conditions of Contract for Construction for Building and Engineering Works designed by the Employer. The Pink Book: Harmonised Red Book (MDB Edition) Conditions of Contract for Construction for Building and Engineering Works designed by the Employer. For use as part of the standard bidding documents by the Multilateral Development Banks only.

In September 1999, FIDIC introduced its new Suite of Contracts, which included a "new" Red, Yellow, Silver and Green forms of contract. The "new" Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: · background and concepts of the various forms of contract; · a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; · analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned; · a range of 'decision tree' charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; · a much enlarged discussion of the meaning of "claim" and "dispute" and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submission of claims by a contractor and by an employer; · the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and · five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

The terms of the Conditions of Contract for Design - Build and Turnkey have been prepared by the Federation Internationale des Ingenieurs Conseils (FIDIC) and are recommended for general use for the purpose of the design and construction of works where tenders are invited on an international basis; with minor modifications, the Conditions are also suitable for use on domestic contracts.

This guide will help the contractor's staff overcome some of the difficulties encountered on a typical international contract using FIDIC forms. The majority of FIDIC-based contracts use the Red Book (Conditions of Contract for Construction), so this book concentrates on the use of those particular forms. Supplementary comments are included in Appendix C for the Yellow Book (Plant & Design-Build) recommended for use where the contractor has a design responsibility. The Contractor is represented on site by the Contractor's Representative who carries the overall responsibility for all the Contractor's on-site activities. In order to provide guidance to the Contractor's Representative and his staff, this book is divided into five sections: A summarized general review of the Red Book from the Contractor's perspective. A review of the activities and duties of the Contractor's Representative in the same clause sequencing as they appear in the Red Book. A summary of these activities and duties but arranged in order of their likely time sequence on site. This has the added intention of providing the Contractor's Representative with a means of ensuring that documents are not only properly provided to the Employer and Engineer, but most importantly that they are provided within the time limits specified in the Contract. A selection of model letters is provided which make reference to the various clauses of the contract requiring the Contractor to make submissions to the Employer or Engineer. Various appendices. The guide is not intended to be a review of the legal aspects of FIDIC-based contracts; legal advice should be obtained as and when necessary, particularly if the Contractor has little or no knowledge of the local law. Armed on site with a copy of The Contractor and the FIDIC Contract, the Contractor's Representative will be more able to avoid contractual problems rather than spend considerable time and energy resolving those problems once they have arisen.

When all parties involved in the construction process fully understand their roles and are able to anticipate potential points of conflict, disputes and delays will be minimised. The Employer's and Engineer's Guide to the FIDIC Conditions of Contract sets out the essential administrative requirements of a FIDIC based contract by reference to the FIDIC 1999 Red Book. The obligations and duties of the Employer and the Engineer are identified and discussed. Potential pitfalls are highlighted and likely consequences pointed out. The importance of the Employer's role in the preparation of tenders, which fully reflect his requirements and duties and obligations arising in the execution of the works, is emphasised. The key role of the Engineer in the effective administration of contracts after award is examined and commentary provided. Included in the guide are a number of appendices, including model letters which will be of value to less experienced staff (particularly those whose mother-tongue is not the English language). Engineers, quantity surveyors and project managers engaged in the contractual administration of international projects using FIDIC forms of contract will find the concise guidance in simple and jargon-free language provided here invaluable. This, together with the author's earlier book, Contractor's Guide to the FIDIC Conditions of Contract - which describes the duties, rights and responsibilities of the Contractor - represents the totality of supervision, design and execution of construction projects executed under the FIDIC Conditions of Contract. This book's companion website offers invaluable resources to freely download, adapt and use: Model letters for use by the Employer Model letters for use by the Contractor Sample Interim Payment Certificate Model Form for Submissions to the Engineer Model Form of Engineer's Order for Varied Works Model Form of Daywork/Daily Record Sheets

FIDIC Contracts: Law and Practice is sure to become the leading industry standard guide to using the FIDIC forms, and is the only book to date which deals with the whole suites of contracts, including the new gold book for Design, Build and Operate projects. The White & Case work is outstanding in its detailed consideration and treatment of the legal aspects of the interpretation and application of the Conditions, touching on many points that most people would not have encountered. Humphrey LLOYD, International Construction Law Review [2010] ICLR 386
