Bestselling author Christopher Hart helps artists master the fundamentals of drawing natural-looking figures. Eschewing esoteric art poses, he portrays real-life gestures, such as standing, sitting, kneeling, and reclining, with arms folded, ankles crossed, hands on hips, and more, all shown from various angles. Hart also explores deeper concepts such as perspective, depth, shadows, and foreshortening, and provides step-by-step tutorials throughout."

This is the easy way to learn how to draw people! Chris Hart offers straightforward solutions to common figure-drawing problems encountered by aspiring artists. Hart's accessible techniques include focusing on the body's natural curves, rather than drawing muscles, and breaking the torso down into three distinct, understandable areas. With this book, anyone can immediately grasp the basics--and create the art to prove it!

From head to toe, the human form, in all its complexities, is visually simplified to such a degree in this remarkable workbook that even complete beginners will soon be able to draw accurate, well-proportioned faces and figures every time they try. Avoiding complex charts of muscles and bones that are more helpful to doctors than to artists, this book's refreshing approach teaches anatomy from a cartoonist/illustrator's point of view. For example, there are many large and small muscles in the neck, all rendered in great detail in most anatomy books, but here, master teacher Christopher Hart shows only the four that are visible and need to be drawn. His clear instruction helps readers to visualize and portray shifting body weight in a pose without the need of a model, and instead of showing a mass of facial muscles and bones, he translates them into the simple planes an artist needs to draw a range of expressive faces.
