The main theme of Fire on the Water is that conventional measures of military balance, employed by both the general public and many policy experts, underestimate the threat that China ’ s military modernization poses to the U.S. position in the Asia-Pacific region. Within a decade, China ’ s leaders will have the military power to hold at risk U.S. interest in East Asia. The U.S. needs to fashion a new and competitive strategy, one that better matches the strengths of the U.S. and its allies against China ’ s vulnerabilities, in order to maintain a balance of power in the region and convince China ’ s leaders to pursue a cooperative course. It is not obvious to many observers why a conflict in the region is plausible, or why the U.S. should bear the responsibility for maintaining a forward military presence in the region. China has rapidly emerged as a great power and by doing so, has acquired many vital interests around the world. Following the pattern set by other such episodes in history, China is also acquiring the military means to protect its new interests, a development that puts at risk the interests of China ’ s neighbors and the United States. The U.S. forward military presence in the region is an increasingly difficult burden to sustain. But in the long run, this approach will be less costly and less risky than encouraging China ’ s neighbors to balance China by themselves, an alternative that will very likely result in an unstable arms race and a conflict that will damage America ’ s interests. While it will be in America ’ s interest to maintain its position in the Asia-Pacific region, China ’ s military modernization is making it much more difficult for the U.S. to do so. China ’ s military strategy, centered on its rapidly-expanding land-based and anti-ship missile forces, is exploiting weaknesses in long-standing U.S. force structure and doctrine. Due to a variety of institutional barriers, the U.S. has been slow to adapt to China ’ s military modernization. Current efforts to respond are impractical, in that they expend U.S. resources against China ’ s strengths rather than its vulnerabilities. The U.S. needs a new and competitive strategy that will strengthen its alliances in the region and convince China ’ s leaders that cooperation, rather than military expansion and an attempt at regional hegemony, will be China ’ s best course. Fire on the Water proposes reforms to U.S. diplomacy, military programs, and strategy that will offer a better chance at preserving stability. The goal of these reforms is to thwart China ’ s well-designed military modernization plan, bolster the confidence and credibility of U.S. alliances in the region, and thus persuade China ’ s leaders that China ’ s best course is cooperation rather than conflict, the outcome that has usually occurred in history when a new great power has rapidly emerged.

A novel based on a true tale of heroism and invention in the tunnels beneath Lake Erie in 1916 This original graphic novel imagines the lives of blue-collar workers involved in the real-life Lake Erie tunnel disaster of 1916 in Cleveland. Author Scott MacGregor and illustrator Gary Dumm tell the intersecting stories of a brilliant African American inventor, Ben Beltran (based on the real-life Garrett Morgan, Sr.), desperate immigrants tunneling beneath Lake Erie, and corrupt overseers who risk countless lives for profit. As historical fiction, Fire on the Water sheds light not only on one of America ’ s earliest man-made ecological disasters but also on racism and the economic disparity between classes in the Midwest at the turn of the century.

Haddick maintains that within a decade China will have the military power to place U.S. influence throughout East Asia at risk. To avoid a future crisis, the United States needs to fashion a new and more competitive strategy, one that better matches the strengths of the United States and its allies against China's vulnerabilities. He proposes far-reaching changes to U.S. diplomacy, military programs, and strategies to counter China's well-designed military modernization plan.

Recipient of the Independent Publishers Award for Historical Fiction (Gold Medal), the Foreword Book of the Year Award for Historical Fiction (Bronze Medal), and an honorable mention in the category of General Fiction for the Eric Hoffer Award. Luis de Santángel, chancellor to the court and longtime friend of the lusty King Ferdinand, has had enough of the Spanish Inquisition. As the power of Inquisitor General Tomás de Torquemada grows, so does the brutality of the Spanish church and the suspicion and paranoia it inspires. When a dear friend ’ s demise brings the violence close to home, Santángel is enraged and takes retribution into his own hands. But he is from a family of conversos, and his Jewish heritage makes him an easy target. As Santángel witnesses the horrific persecution of his loved ones, he begins slowly to reconnect with the Jewish faith his family left behind. Feeding his curiosity about his past is his growing love for Judith Migdal, a clever and beautiful Jewish woman navigating the mounting tensions in Granada. While he struggles to decide what his reputation is worth and what he can sacrifice, one man offers him a chance he thought he ’ d lost...the chance to hope for a better world. Christopher Columbus has plans to discover a route to paradise, and only Luis de Santángel can help him. Within the dramatic story lies a subtle, insightful examination of the crisis of faith at the heart of the Spanish Inquisition. Irresolvable conflict rages within the conversos in By Fire, By Water, torn between the religion they left behind and the conversion meant to ensure their safety. In this story of love, God, faith, and torture, fifteenth-century Spain comes to dazzling, engrossing life.

Sacred chants are Ada Franklin ’ s power and her medicine. By saying them, she can remove warts, stanch bleeding, and draw the fire from burns. At age twenty, her reputation as a faith healer defines her in her rural Pennsylvania community. But on the day in 1953 that her family ’ s barn is consumed by flame, her identity as a healer is upended. The heat, the roar of the blaze, and the bellows of the trapped cows change Ada. For the first time, she fears death and—for the first time—she doubts God. With her belief goes her power to heal. Then Ada meets an agnostic named Will Burk and his pet raven, Cicero. Fire Is Your Water is acclaimed memoirist Jim Minick ’ s first novel. Built on magical realism and social observation in equal measure, it never gives way to sentimentality and provides an insider ’ s glimpse into the culture of Appalachia. A jealous raven, a Greek chorus of one, punctuates the story with its judgments on the characters and their actions, until a tragic accident brings Ada and Will together in a deeper connection.

Only in the glaring light of hindsight does pediatric surgeon Kate Murphy understand that she was groomed for the path she ’ s taken. Raised by a widowed dad and a misshapen, sometimes comical trio of parental surrogates from Murphy ’ s Pub, her father ’ s Irish bar in San Francisco, Kate has never understood how protected she is—but when she learns that her well-meaning family has hidden bitter truths about her mother ’ s mental illness and death, the rest of her family history unravels. Kate is still recovering from her family ’ s deception when she becomes involved with Jake Bloom—a charming artist different than anyone she ’ s ever known. When she experiences his sculptures on Ocean Beach, she is forever changed; in the months that follow, Jake reveals beauty Kate has never noticed, and exposes her to spontaneity, sensuality, and love deeper than she ’ d imagined it could be. Only Mary K—Kate ’ s hard-edged best friend who doesn ’ t miss a thing and names bull when she sees it—is immune to Jake ’ s charms. She sees the potential for danger in Jake, and, of course, she says so. Caught between her newfound passion and her friendship, Kate dismisses her friend ’ s warnings. Ultimately, it isn ’ t until she is in too deep, with a daughter on the way, that Kate understands what Mary K feared on her behalf. Fire & Water is a story of navigating the treacherous territory of passionate love, friendship, and family devotion—and of how love is always a matter of life and death.

A Sámi woman studying Alaska fish populations sees our past and future through their present signs of stress and her ancestral knowledge. A teenager faces a permanent drought in Australia and her own sexual desire. An unemployed man in Wisconsin marvels as a motley parade of animals makes his trailer their portal to a world untrammled by humans. Featuring short fiction from authors around the globe, Fire & Water: Stories from the Anthropocene takes readers on a rare journey through the physical and emotional landscape of the climate crisis--not in the future, but today. By turns frightening, confusing, and even amusing, these stories remind us how complex, and beautiful, it is to be human in these unprecedented times.

Sohrab Ahmari was a teenager living under the Iranian ayatollahs when he decided that there is no God. Nearly two decades later, he would be received into the Roman Catholic Church. In From Fire, by Water, he recounts this unlikely passage, from the strident Marxism and atheism of a youth misspent on both sides of the Atlantic to a moral and spiritual awakening prompted by the Mass. At once a young intellectual ’ s finely crafted self-portrait and a life story at the intersection of the great ideas and events of our time, the book marks the debut of a compelling new Catholic voice.

Lenora Warren tells a new story about the troubled history of abolition and slave violence by examining representations of shipboard mutiny and insurrection in late eighteenth- and early nineteenth-century Anglo-American and American literature. Fire on the Water centers on five black sailors, whose experiences of slavery and insurrection either inspired or found resonance within fiction: Olaudah Equiano, Denmark Vesey, Joseph Cinqué, Madison Washington, and Washington Goode. These stories of sailors, both real and fictional, reveal how the history of mutiny and insurrection is both shaped by, and resistant to, the prevailing abolitionist rhetoric surrounding the efficacy of armed rebellion as a response to slavery. Pairing well-known texts with lesser-known figures (Billy Budd and Washington Goode) and well-known figures with lesser-known texts (Denmark Vesey and the work of John Howison), this book reveals the richness of literary engagement with the politics of slave violence.
