This fully-illustrated guide covers general principles and tuning theory, tuning for extra zest, performance exhaust systems, uprating the ignition system, overhauling and fitting a Weber DGAV 32/36 carbureter, and more for getting the most from your engine.

In his trademark straight-talking, no-nonsense style Mark Webber reveals his amazing life on and off the Formula One race track in Aussie Grit. Mark Webber was at the centre of one of the most captivating chapters in the history of Formula One. In 2010, while racing for Red Bull, he and his team mate Sebastian Vettel went head to head for the World Championship. There could only be one winner. Since retiring from Formula One Mark has concentrated on endurance racing, including the legendary Le Mans 24 Hour race. He hit the front pages of newspapers around the world in December 2014 when he slammed into the barricades in the final round of the FIA World Endurance Championship in South America, and was lucky to escape with his life. But the controversy of his relationship on and off the track with Vettel, who went on to win multiple world titles, has never been far beneath the surface. Here, for the first time, Webber tells the inside story of one of Formula One's most intriguing battles - it is a story that goes to the heart of why the sport is loved by millions of fans around the world. From his first taste of karting to his F1 debut in 2002, scoring Minardi's first points in three years at the Australian Grand Prix, through to his first win with Red Bull at the 2009 German Grand Prix and the year he should have been crowned World Champion. Mark Webber's journey to the top of Formula One was every bit as determined and committed as his racing. Aussie Grit is his searingly honest story. Includes a foreword by Formula One legend Sir Jackie Stewart.

The international financial value of Grand Prix racing has grown substantially in recent years. This book will focus upon the massive size, value, importance and impact of the industry. It will also investigate the dominance of UK based Research and Development and design and the development of team strategy and tactics. The authors have based their analysis upon very up-to-date research involving interviews with key individuals at the highest level and visibility within the industry and focus upon the key management themes of teamworking, leadership, strategy and innovation.

Presents a history of sports cars from the earliest models, to the hot rods of the 1950s and 1960s, to contemporary styles

Ever been forced to build your own car?THE SEVEN, the legendary Lotus sports car that first appeared in 1957 is still in production, as a kit. If you want one you must build it.The author sets out to build a Caterham Seven without first acquiring the needed skills. The fingertip ease of the digital age is replaced by unheated garages, fumes and typed instructions obscured by oily fingerprints. Between chapters a running history, illustrated with cartoons, tells the Seven's 50 year story using quotes from the many articles, test drives and books on the car. For anyone who has ever wanted to build something with their own hands - despite skill, aptitude and experience.Why build A Seven?Putting a sportscar on the road.

This book covers the entire history, life and times of the famous British high-performance engineering company, from its 1958 foundation by Mike Costin and Keith Duckworth, through its often-exciting and always fascinating evolution, to its expansion and worldwide success in both motorsport and high-performance road car production.

An autobiography of Stuart Turner, one of the leading motorsport figures of the last 40 years. He claims to have had two major pieces of luck - he joined the British Motor Corporation as Competitions Manager when the Mini Cooper was coming on strong and then moved to Ford just as the Escort was starting to shine. He includes anecdotes about many of the top race and rally drivers, including several World Champions, whom he knows personally.

Extracting maximum torque and horsepower from engines is an art as well as a science. David Vizard is an engineer and more aptly an engine building artist who guides the reader through all the aspects of power production and high-performance engine building. His proven high-performance engine building methods and techniques are revealed in this all-new edition of How to Build Horsepower. Vizard goes into extreme depth and detail for drawing maximum performance from any automotive engine. The production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust. Explained is how to optimize all the components in between, such as selecting heads for maximum flow or port heads for superior power output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.
