Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

As the baby-boomer generation ages, nursing home care is likely to become a major social problem. New residents will put huge strains on already short staffing at a time when funding to government-assisted homes (75 percent of all nursing homes) is lower than ever.Based on her ten years of experience working as a Licensed Practical Nurse in many care facilities, attorney Donna M. Reed shares her insider knowledge to help ensure that nursing home residents receive the best care possible. Reed focuses on the following key points:•The legal requirements of nursing homes regarding delivery of care•The ways in which many nursing homes regularly break these laws•Detailed descriptions of how the typical nursing home operates•The responsibilities of each nursing home employee•Nursing home inspections•Residents' rights•How to avoid substandard care•What actions to take to improve nursing home lifeReed's firsthand knowledge of nursing home care and her in-depth understanding of the legal requirements that protect residents offer invaluable information to readers concerned about a loved one in a nursing home.Donna M. Reed worked as a nursing assistant and Licensed Practical Nurse in numerous nursing homes in California and New England. She is now an attorney and lives in North Carolina.

The subject of fairies in Celtic cultures is a complex one that seems to endlessly intrigue people. What exactly are fairies? What can they do? How can we interact with them? Answering these questions becomes even harder in a world that is disconnected from the traditional folklore and flooded with modern sources that are often vastly at odds with the older beliefs. This book aims to present readers with a straightforward guide to the older fairy beliefs, covering everything from Fairyland itself to details about the beings within it. The Otherworld is full of dangers and blessings, and this guidebook will help you navigate a safe course among the Good People.

Looks at the combustion basics of fuel injection engines and offers information on such topics as VE equation, airflow estimation, setups and calibration, creating timing maps, and auxiliary output controls.
