Get professional looking shots from a low-cost camera Save money by building your own lighting rigs, tripods, monopods and stabilisers for next to nothing Learn how to use older lenses on modern digital cameras, and make your own macro lens, lens hoods, flash diffusers, flash concentrators, decorative Bokeh effect lenses and more Use dozens of FREE and low cost photo applications for processing, viewing, cataloguing, editing, creating HDR, and photo stitching Build powerful photography processing and editing suites with free software and plugins that go head to head with expensive tools like Adobe Photoshop and Lightroom

The Third Edition of Journalism Next: A Practical Guide to Digital Reporting and Publishing is the most informed, practical, and succinct guide to digital technology for journalists. Author Mark Briggs' forward-thinking techniques and accessible style prepares today's journalists for tomorrow's media landscape transformations. Readers will learn how to effectively blog, crowdsource, use mobile technology, mine databases, and expertly capture audio and video to report with immediacy, cultivate community, and convey compelling stories. Briggs helps readers quickly improve their digital literacy by presenting the basics and building on them to progress towards more specialized skills within multimedia. Readers will become equipped to better manage online communities and build an online audience. Journalism Next is a quick yet valuable read that provides a detailed roadmap for journalists to reference time and time again.

Alongside a general introduction to website development and design, this book features instructional guides for four of the most popular WYSIWYG editors. With an eye to the specific needs of museums and historic sites, Free and Easy Website Design for Museums and Historic Sites leads readers through the process of building an online presence and adapting various technologies for museum use. This book emphasizes the importance of harnessing the power of the Internet for cultural institutions.

Using practical examples from librarians in the field, this book lays out current issues in online learning and teaches librarians how to adapt a variety of library services—including instruction, reference, and collection development—to online education. Recent studies highlighting the challenges faced by online learners show that skills librarians are uniquely qualified to teach, such as information and digital literacy and source evaluation, can improve academic performance in online courses and enhance the online learning experience. Just as embedded librarianship was developed to answer the needs of online courses when they emerged in the early 2000s, online learning librarian Christina Mune now teaches "online librarianship" as a set of realistic strategies for serving a variety of online education models. Each chapter of Libraries Supporting Online Learning addresses a different strategy for supporting online students and/or faculty, with all strategies derived from real-world practices. Librarians will find information on best practices for creating digital literacy tutorials and dynamic content, providing patrons with open access and open educational resources, helping patrons to avoid copyright issues, promoting peer-to-peer learning and resource sharing, posting to social media, and developing scalable reference services. The tools and practical examples in this book will be useful for all educators interested in increasing the efficacy of online learning. Offers practical strategies to librarians responsible for supporting hybrid and online courses and degree programs as well as MOOCs May be easily adopted as a library science textbook for those teaching instructional design, instructional technology, distance librarianship, or academic library issues courses Includes case studies on assessment information and grant writing for administrators and library advocates Informs all educators interested in increasing the efficacy of online learning in higher education Is suitable for inclusion in academic collections supporting library and information science

Sono presentate le tematiche relative alle Tecnologie dell'Informazione per i Beni Culturali: sistemi multimediali, archivi, protezione dei dati, accesso ai contenuti digitali, gallerie virtuali. Particolare rilievo è riservato alle immagini digitali (Electronic Imaging & the Visual Arts), che riguardano le istituzioni culturali (musei, biblioteche, palazzi – monumenti, siti archeologici). La conferenza internazionale è articolata nelle seguenti sessioni: Attività di interesse generale strategico; Nuove Tecnologie e Applicazioni; Nuovi Sviluppi Tecnologici 2D-3D e Applicazioni; Gallerie Virtuali – Musei Digitali e relative Iniziative; Accesso alle Informazioni relative ai Beni Culturali. Due Workshops riguardano: la Collaborazione Internazionale; l'Innovazione e l'Impresa.

Save thousands of dollars in PR agency fees, this book will tell you which digital promotion tools & marketing techniques music publicists are using themselves!101 Ways To Market Your Music On The Web is a great book for independent artists, bands and labels seeking to market and promote their music via the web at little or no cost. Written by MyMusicSuccess Co-Founder Simon Adams, he shares his 25 years of music industry experience as an artist, producer, publicist and promoter to help independent musicians around the world harness the power of internet music promotionThis 256 page book is the most comprehensive and practical manual ever compiled on digital music marketing. With interviews and quotes from music industry executives, promoters and successful independent artists you'll also gain an insight into some of the ways others have successfully used the world wide web to build their fanbase, collaborate in new projects, and increase the exposure of their music.

Servlet and JavaServer Pages (JSP) are the underlying technologies for developing web applications in Java. They are essential for any programmer to master in order to effectively use frameworks such as JavaServer Faces, Struts 2 or Spring MVC. Covering Servlet 3.1 and JSP 2.3, this book explains the important programming concepts and design models in Java web development as well as related technologies and new features in the latest versions of Servlet and JSP. With comprehensive coverage and a lot of examples, this book is a guide to building real-world applications.
