France has always been a fantasy for people around the world and is still considered symbol of Romance and the Beauty. However, there are not many people who know the real France and how the country is largely overestimated by the world audience and French citizens. This book will provide readers with an unusual and informative overview of the country from an insider perspective. Unlike those of Wikipedia or Lonely planet this guide will not provide your typical travel information. Instead you will read about all the 'little secrets' of France that is unavailable in your everyday travel guidebooks. 'French Secrets' is written on the basis of 'Modus Tollendo Tollens' (the mode which denies by denying) that defies what is commonly known among people by exposing political, social, cultural, economic, historical, industrial unknown facts. For example, France is well known as the country of beauty but you will find that this definition is not true in this book, and readers will discover hidden facts that bring raise doubt to their previous belief and knowledge. Directly 'exposing unknown facts' is 'Knowing the truth.' A truth that is crucial to people with specific purposes such as business, trade, studying, conference, vacation, etc. For this reason, this book includes scientific studies that have been interpreted into philosophical terms. For example, the British often describe the French as 'rude, arrogant and selfish.' This insider's guide will explain why they feel this way with concerned scientific statistics. This book is, therefore, easy to read, useful, full of information, and with humorous insight. Both Global standard and Cultural relativity are represented in this book. Because each country has different social values that are generated from different historical experiences, there are still common human values that are called 'Global standards' in this book. This is because in spite of their differences in nationality and ethnics human beings share the same biological and social needs in their lives. Biological living conditions, freedom of speech, being polite to others, being socially responsible, health care, education, housing, etc. They are all equally important to every human being. Global standards are therefore defined as 'Ethical requirements' in this book. However the Cultural relativity otherwise known as 'the Locality' cannot be disregarded because this is a realistic requirement for safety and respect while visiting a different world. For example everyone in the western world agrees that women are unfairly treated in Islamic countries and other areas of the world such as India. This is because the freedom and respect of women in these countries are greatly disregarded in their society. The Islamic system may be viewed as democratic to Muslims because they are living in a different world that is ruled by 'Theocratic democracy' and it is based on their scriptures. It is unlike our 'Secular democracy or Humanistic democracy' that are based on a constitution. These kinds of disputes are also found in the western world even though we share the same Christianity based civilization. The hostility between Socialist democracy and Capitalist democracy or ethnic conflicts between the Aryan and the Slav are examples of these as well. In conclusion, the philosophical balance becomes critically important when we review a country because a creditable conclusion is deductible only when the inference is true. For example, a syllogism of 'USA is good, and Iran is the enemy state of USA, therefore Iran is the evil' is not creditable because the premise is gravely lacking objective scientific evidence but only provides a subjective ideological belief. One thing is certain in this book, anything that is against Global standards (in other words, Ethical requirements) is defined as 'false' regardless of excuses regarding Cultural relativity.

If you're a devotee of historical fiction, then you will fall in love with this beautifully written novel. The French Secret is a highly entertaining family saga which gives a very finely detailed and well-depicted portrayal of pre- and post-war France, Britain, and the USA. When young Clara leaves her parents in Preston and goes to live with her aunt, uncle and cousin in Brittany, her life takes a turn for the better. She quickly adapts to the French culture, works hard at her family's bar and bakes for the local patisserie. When not working, she has a close circle of friends to call on and carves out an enviable life for any young girl. So it is little wonder she wants to remain in Brittany when her stay comes to an end three months later. Thankfully, she doesn't return to the UK and her story takes on a new drama and depth that neither she nor her family could have ever predicted. With the onset of World War II, the arrival of Nazis in the village, British intelligence connections, and a rollercoaster of emotions, young Clara quickly has some growing up to do. And when she becomes a mother, and a wife to an abusive husband, it seems that she is headed for tragedy. Will Clara ever find the happiness she deserves? Will she ever return home to see her parents? Will she be marred by tragedy forever? Find out all this and much, much more, in this gripping, romantic historical novel.

This is not an ordinary cookbook. Most cookbooks tell you to follow a recipe and you'll create good food. This cookbook is a workbook that teaches you how to cook, explaining the interplay between techniques, flavors, and how to combine them into quick and easy dishes, or how to adjust recipes into something that better suits your family's tastes.
