GATE Previous Years Papers [PDF] – GATE 2021 score is valid for three years from the date of announcement of the results. Earlier students use to consider few options after cracking gate exam such as scientist or a professor but nowadays the scenario has changed and scope has widen up.

This book is one-stop solution for GATE aspirants to crack the GATE exam. The book includes previous years GATE questions segregated topic-wise along with exam analysis at the beginning of every unit. It will help the GATE aspirants to get an idea about the pattern and weightage of questions asked in GATE examination. The book also contains one free online mock test based on GATE examination pattern for practice.

18 years GATE Electronics & Communication Engineering Topic-wise Solved Papers (2000 - 17) The book covers fully solved past 18 years question papers from the year 2000 to the year 2017. The salient features are:The book has 3 sections - General Aptitude, Engineering Mathematics and Technical Section.Each section has been divided into Topics. Aptitude - 2 parts divided into 9 Topics, Engineering Mathematics - 7 Topics and Technical Section - 8.Each chapter has 3 parts - Quick Revision Material, Past questions and the Solutions.The Quick Revision Material list the main points and the formulas of the chapter which will help the students in revising the chapter quickly.The Past questions in each chapter have been divided into 5 types:1. Conceptual MCQs2. Problem based MCQs3. Common Data Type MCQs4. Linked Answer Type MCQs5. Numerical Answer QuestionsThe questions have been followed by detailed solutions to each and every question.In all the book contains 1800+ MILESTONE questions for GATE Electronics & Communication Engineering.

New edition of a text intended primarily for the undergraduate courses on the subject which are frequently found in electrical engineering curricula--but the concepts and techniques it covers are also of fundamental importance in other engineering disciplines. The book is structured to develop in parallel the methods of analysis for continuous-time and discrete-time signals and systems, thus allowing exploration of their similarities and differences. Discussion of applications is emphasized, and numerous worked examples are included. Annotation copyrighted by Book News, Inc., Portland, OR

This book offers an excellent and practically oriented introduction to the basic concepts of modern circuit theory. It builds a thorough and rigorous understanding of the analysis techniques of electric networks, and also explains the essential procedures involved in the synthesis of passive networks. Written specifically to meet the needs of undergraduate students of electrical and electronics engineering, electronics and communication engineering, instru-mentation and control engineering, and computer science and engineering, the book provides modularized coverage of the full spectrum of network theory suitable for a one-semester course. A balanced emphasis on conceptual understanding and problem-solving helps students master the basic principles and properties that govern circuit behaviour. A large number of solved examples show students the step-by-step processes for applying the techniques presented in the text. A variety of exercises with answers at the chapter ends allow students to practice the solution methods. Besides students pursuing courses in engineering, the book is also suitable for self-study by those preparing for AMIE and competitive examinations. An objective-type question bank at the end of book is designed to see how well the students have mastered the material presented in the text.

This best-selling introduction to automatic control systems has been updated to reflect the increasing use of computer-aided learning and design, and revised to feature a more accessible approach — without sacrificing depth.

An Idial Book for ISRO Computer Science - Previous Years' Solved Papers (2008-2018)

We all are indebted to nature for providing us food and its resources for our subsistence and survival. In the food domain, cereal and legume grains occupy the front line, whereas, horticultural crops have occupied the second line of defense. For healthy diet cereals and legumes provide us with carbohydrates and protein, whereas, fruits and vegetables provide us minerals and vitamins. Both macro- and micro- nutrients are essential for human growth and development. The fruits and vegetables are the major source of micro-nutrients. It is estimated that up to 2.7 million lives could potentially be saved each year if fruit and vegetable production was sufficiently increased. Both at national and international levels, food and agriculture/horticulture development plans and estimates are basically developed, framed and implemented, and narrowed down to cereal production. In the present context of attaining nutrition security, this mode of thinking on ' food ' needs to be changed to ' nutrients ', which will include necessarily all those crops including fruit and vegetables which provide all macro- and micro-nutrients to ensure balanced nutrition needed for good human health. The present publication has attempted to reflect and discuss the above views and ideas on the subject of sustainable horticulture development and nutrition security in nine chapters with 32 articles by 32 authors.

This Report is one of the first comprehensive studies on young children in India. It focuses on children under 6 years of age and presents key aspects of their well-being and development. With the highest number of neonatal, infant and under-5 deaths in the world, there is an urgent need to address issues that continue to affect the young child in India. This volume: Introduces two young child indices aggregating selected indicators to separately track child outcomes and child circumstances. Provides an account of the current situation of the young child in terms of physical and cognitive development, access to care, disadvantaged children and major issues that have led to the continued neglect of this age group. Explores the policy and legal framework, fiscal space and the role and obligations of key stakeholders, including the state, private sector, civil society, media and the family. Highlights key recommendations and action points that can help to improve the ecosystem for early childhood care and development. Drawing on specially commissioned technical background papers, supplemented by extensive field experience of Mobile Creches in childcare, this Report will be of interest to practitioners, policymakers and influencers, think tanks and researchers of public policy, development studies, human rights, sociology and social anthropology, as well as general readers. The Open Access version of this book, available at http://www.tandfebooks.com/doi/view/10.4324/9781003026488, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. .
