Indonesia has urbanized rapidly since its independence in 1945, profoundly changing its economic geography and giving rise to a diverse array of urban places. These places range from the bustling metropolis of Jakarta to rapidly emerging urban centers in hitherto largely rural parts of the country. Although urbanization has produced considerable benefits for many Indonesians, its potential has only been partially realized. Time to ACT: Realizing Indonesia ' s Urban Potential explores the extent to which urbanization in Indonesia has delivered in terms of prosperity, inclusiveness, and livability. The report takes a broad view of urbanization ' s performance in these three key areas, covering both the monetary and nonmonetary aspects of welfare. It analyzes the fundamental reforms that can help the country to more fully achieve widespread and sustainable benefits, and it introduces a new policy framework—the ACT framework—to guide policy making. This framework emphasizes the three policy principles of Augment, Connect, and Target: • Augment the provision and quality of infrastructure and basic services across urban and rural locations • Connect places and people to jobs and opportunities and services • Target lagging areas and marginalized groups through well-designed place-based policies, as well as thoughtful urban planning and design. Using this framework, the report provides policy recommendations differentiated by four types of place that differ in both their economic characteristics and the challenges that they face— multidistrict metro areas, single-district metro areas, nonmetro urban areas, and nonmetro rural areas. In addition to its eight chapters, Time to ACT: Realizing Indonesia ' s Urban Potential includes four spotlights on strengthening the disaster resilience of Indonesian cities, the nexus between urbanization and human capital, the " invisible † ? crisis of wastewater management, and the potential for smart cities in Indonesia. If Indonesia continues to urbanize in line with global historical standards, more than 70 percent of its population will be living in towns and cities by the time the country celebrates the centenary of its independence in 2045. Accordingly, how Indonesia manages this continued expansion of its urban population—and the mounting congestion forces that expansion brings—will do much to determine whether the country reaches the upper rungs of the global ladder of prosperity, inclusiveness, and livability.

This book provides an overview of the environmental problems that arise from construction activity, focusing on refurbishment as an alternative to the current crisis in the construction sector, as well as on measures designed to minimize the effects on the environment. Furthermore, it offers professionals insights into alternative eco-efficient solutions using new materials to minimize environmental impacts and offers solutions that they can incorporate into their own designs and buildings. It also demonstrates best practices in the cooperation between various universities in Andalusia in Spain and Latin America and many public and private companies and organizations. This book serves as a valuable reference resource for professionals and researchers and provides an overview on the status of investigations to find solutions to improve sustainable development in terms of materials, systems, facilities, neighborhoods, buildings, and awareness of the society involved.

The book deals with basic cellular and molecular mechanisms associated with aging. It comprehensively describes the important genetic, epigenetic, biochemical and metabolic regulations during aging, as well as some important age-related diseases.The book is divided into four major sections for easy understanding. It takes the readers through the various aspects of aging in a story-like manner. Certain interventions for healthy aging such as dietary restriction, regular exercise and maintaining a balanced and peaceful life-style are also suggested by the experts. The book would be a companion for both beginners, as well as established researchers in the field. It would be useful for science education, research, clinical approach and policy making.

Complete PET is a brand new course for the PET exam. It combines the very best in contemporary classroom practice with stimulating topics aimed at teenagers and young adults. The course covers every part of the PET exam in detail providing preparation, practice, information and advice to ensure that students are fully prepared for every part of the exam. Informed by Cambridge's unique searchable database of real exam scripts, the Cambridge Learner Corpus, and providing an official PET past exam paper from Cambridge ESOL, Complete PET is the most authentic PET exam preparation course available.

A NEW YORK TIMES BESTSELLER WINNER OF THE 2019 NATIONAL BOOK AWARD FOR NONFICTION A brilliant, haunting and unforgettable memoir from a stunning new talent about the inexorable pull of home and family, set in a shotgun house in New Orleans East. In 1961, Sarah M. Broom ' s mother Ivory Mae bought a shotgun house in the then-promising neighborhood of New Orleans East and built her world inside of it. It was the height of the Space Race and the neighborhood was home to a major NASA plant—the postwar optimism seemed assured. Widowed, Ivory Mae remarried Sarah ' s father Simon Broom; their combined family would eventually number twelve children. But after Simon died, six months after Sarah ' s birth, the Yellow House would become Ivory Mae ' s thirteenth and most unruly child. A book of great ambition, Sarah M. Broom ' s The Yellow House tells a hundred years of her family and their relationship to home in a neglected area of one of America ' s most mythologized cities. This is the story of a mother ' s struggle against a house's entropy, and that of a prodigal daughter who left home only to reckon with the pull that home exerts, even after the Yellow House was wiped off the map after Hurricane Katrina. The Yellow House expands the map of New Orleans to include the stories of its lesser known natives, guided deftly by one of its native daughters, to demonstrate how enduring drives of clan, pride, and familial love resist and defy erasure. Located in the gap between the " Big Easy " of tourist guides and the New Orleans in which Broom was raised, The Yellow House is a brilliant memoir of place, class, race, the seeping rot of inequality, and the internalized shame that often follows. It is a transformative, deeply moving story from an unparalleled new voice of startling clarity, authority, and power.

This book presents a compilation of current trends, technologies, and challenges in connection with Big Data. Many fields of science and engineering are data-driven, or generate huge amounts of data that are ripe for the picking. There are now more sources of data than ever before, and more means of capturing data. At the same time, the sheer volume and complexity of the data have sparked new developments, where many Big Data problems require new solutions. Given its scope, the book offers a valuable reference guide for all graduate students, researchers, and scientists interested in exploring the potential of Big Data applications.

The growing interest in research on temperament during the last decade has been re corded by several authors (e. g. , R. Plomin; J. E. Bates) from such sources of informa tion as the Social Sciences Citation Index or Psychological Abstracts. The editors' inquiry shows that the number of cases in which the term temperament was used in the title of a paper or in the paper's abstract published in Psychological Abstracts reveals an essential increase in research on temperament. During the years 1975 to 1979, the term temperament was used in the title and/or summary of 173 abstracts (i. e. , 34. 6 publications per year); during the next five years (1980-1984), it was used in 367 abstracts (73. 4 publications per year), whereas in the last five years (1985 to 1989), the term has appeared in 463 abstracts, that is, in 92. 6 publications per year. Even if the review of temperament literature is restricted to those abstracts, it can easily be concluded that temperament is used in different contexts and with different meanings, hardly allowing any comparisons or general statements. One of the consequences of this state of affairs is that our knowledge on temperament does not cumulate despite the increasing research activity in this field. This situation in temperament research motivated the editors to organize a one week workshop on The Diagnosis of Temperament (Bielefeld, Federal Republic of Germany, September 1987).

This book gathers selected papers presented at the 2020 World Conference on Information Systems and Technologies (WorldCIST ' 20), held in Budva, Montenegro, from April 7 to 10, 2020. WorldCIST provides a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences with and challenges regarding various aspects of modern information systems and technologies. The main topics covered are A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human–Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; and N) Technologies for Biomedical Applications.
