Einstein's Jury

Some tried to

got no results.
Others--through

of relativity.
Crelinsten
concludes that
the well-known
British eclipse
expedition of
1919 that made
Einstein famous
had less to do
with the
scientific
acceptance of
his theory than
with his

was not until
the 1920s, when
the center of
gravity of
astronomy and
physics shifted
from Europe to
America, that
the work of

legitimized Einstein's work. As Crelinsten so expertly shows, the glow that now surrounds the famous scientist had its beginnings in these early debates among professional scientists working in the

Centenary

Survey
After completing
the final
version of his
general theory
of relativity in
November 1915,
Albert Einstein
wrote a book
about relativity

audience. His intention was "to give an exact insight into the theory of relativity to those readers who, from a general scientific and philosophical point of view, are interested in the theory,

Access Free

General

but who are not conversant with the mathematical apparatus of theoretical physics." The book remains one of the most lucid explanations of the special and general theories ever written. In the early 1920s
