In addition, you learn how to prepare records and reports that form the foundation of an efficient payroll system.-Back cover.

A modern approach to payroll accounting, Landin/Schirmer's Payroll 2018 provides a "practitioners" view of this highly specialized area of accounting. Incorporating examples of real-world companies, Payroll 2018 highlights the relevance of the course in its coverage of issues that students will face in their careers, such as labor planning and labor costs. Whether you are teaching face-to-face, hybrid, or online, Payroll 2018 is flexible enough to be used in courses as short as three weeks and as long as fifteen weeks. Connect® provides multiple opportunities for students to build their skills through practice, including exercise sets at the end of each chapter, auto-graded payroll and tax forms, the Continuing Payroll Project in each chapter, and a Comprehensive Project that encompasses an entire quarter of payroll accounting topics.

This open access book examines how the social sciences can be integrated into the praxis of engineering and science, presenting unique perspectives on the interplay between engineering and social science. Motivated by the report by the Commission on Humanities and Social Sciences of the American Association of Arts and Sciences, which emphasizes the importance of social sciences and Humanities in technical fields, the essays and papers collected in this book were presented at the NSF-funded workshop "Engineering a Better Future: Interplay between Engineering, Social Sciences and Innovation", which brought together a singular collection of people, topics and disciplines. The book is split into three parts: A. Meeting at the Middle: Challenges to educating at the boundaries covers experiments in combining engineering education and the social sciences; B. Engineers Shaping Human Affairs: Investigating the interaction between social sciences and engineering, including the cult of innovation, politics of engineering, engineering design and future of societies; and C. Engineering the Engineers: Investigates thinking about design with papers on the art and science of science and engineering practice.
