# Online Library Groupe Ariel Case Ysis

in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-

the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material

available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Volume 5, *Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations*, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require

boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

"normal" and that "hatred has been bred in the bone". He reveals the powerful motivations that drive these ordinary people to such extraordinary evil by exploring the different types of terrorists, from national-separatists like the Irish Republican Army to social revolutionary terrorists like the Shining Path, as well as religious extremists like al-Qaeda and Aum Shinrikyo. In *The Mind of the Terrorist*, Post uses his expertise to explain how the terrorist mind works and how this information can help us to combat terrorism more effectively.

Poverty and Shared Prosperity 2016 is the first of an annual flagship report that will inform a global audience comprising development practitioners, policy makers, researchers, advocates, and citizens in general with the latest and most accurate estimates on trends in global poverty and shared prosperity. This edition will also document trends in inequality and identify recent country experiences that have been successful in reducing inequalities, provide key lessons from those experiences, and synthesize the rigorous evidence on public policies that can shift inequality in a way

that bolsters poverty reduction and shared prosperity in a sustainable manner.

Specifically, the report will address the following questions:

- What is the latest evidence on the levels and evolution of extreme poverty and shared prosperity?

- Which countries and regions have been more successful in terms of progress toward the twin goals and which are lagging behind?

- What does the global context of lower economic growth mean for achieving the twin goals?

- How can inequality reduction contribute to achieving the twin goals?

- What does the evidence show concerning global

and between- and within-country inequality trends? • Which interventions and countries have used the most innovative approaches to achieving the twin goals through reductions in inequality? The report will make four main contributions. First, it will present the most recent numbers on poverty, shared prosperity, and inequality. Second, it will stress the importance of inequality reduction in ending poverty and boosting shared prosperity by 2030 in a context of weaker growth. Third, it will highlight the diversity of within-country inequality reduction experiences and will synthesize

experiences of successful countries and policies, addressing the roots of inequality without compromising economic growth. In doing so, the report will shatter some myths and sharpen our knowledge of what works in reducing inequalities. Finally, it will also advocate for the need to expand and improve data collection—for example, data availability, comparability, and quality—and rigorous evidence on inequality impacts in order to deliver high-quality poverty and shared prosperity monitoring.

Throughout the literature of creative learning, many assumptions and even stereotypes about the artists' creativity are nurtured, often according to myths going back to the Romanticism. The authors have been investigating and describing outstanding artists' creativity and learning/working processes, asking the question: &ltI>how do artists create, learn, and organise their work? This book explores these questions by means of original empirical data (interviews with 22 artists) and theoretical research in the field of the arts and creativity from a

learning perspective. Findings shed an original light on how artists learn and create, and how their creative learning and change processes come about, for instance when facilitating and leading creative processes.

What is the value of diplomacy? How does it affect the course of foreign affairs independent of the distribution of power and foreign policy interests? Theories of international relations too often implicitly reduce the dynamics and outcomes of diplomacy to structural factors rather than the subtle

qualities of negotiation. If diplomacy is an independent effect on the conduct of world politics, it has to add value, and we have to be able to show what that value is. In *Diplomacy's Value*, Brian C. Rathbun sets forth a comprehensive theory of diplomacy, based on his understanding that political leaders have distinct diplomatic styles: coercive bargaining, reasoned dialogue, and pragmatic statecraft. Drawing on work in the psychology of negotiation, Rathbun explains how diplomatic styles are a function of the psychological attributes of leaders and the party coalitions they represent. The

combination of these styles creates a certain spirit of negotiation that facilitates or obstructs agreement. Rathbun applies the argument to relations among France, Germany, and Great Britain during the 1920s as well as Palestinian-Israeli negotiations since the 1990s. His analysis, based on an intensive analysis of primary documents, shows how different diplomatic styles can successfully resolve apparently intractable dilemmas and equally, how they can thwart agreements that were seemingly within reach.

This book deals with slums as a specific question and a central focus in urban planning. It radically reverses the official version of the history of world cities as narrated during decades: slums are not at the margin of the contemporary process of urbanization; they are an integral part of it. Taking slums as its central focus and regarding them as symptomatic of the ongoing

transformations of the city, the book moves to the very heart of the problem in urban planning. The book presents 16 case studies that form the basis for a theory of the slum and a concrete development manual for the slum. The interdisciplinary approach to analysing slums presented in this volume enables researchers to look at social and economic dimensions as well as at the constructive and spatial aspects of slums. Both at the scientific and the pedagogical level, it allows one to recognize the efforts of the slum's residents, key players in the past, and present development of their

neighborhoods, and to challenge public and private stakeholders on priorities decided in urban planning, and their mismatches when compared to the findings of experts and the demands of users. Whether one is a planner, an architect, a developer or simply an inhabitant of an emerging city, the presence of slums in one's environment - at the same time central and nonetheless incongruous - makes a person ask questions. Today, it is out of the question to be satisfied with the assumption of the marginality of slums, or of the incongruous nature of their existence. Slums are now fully part of the urban

landscape, contributing to the identity and the urbanism of cities and their stakeholders.

Tumours of the hand are highly varied, their only common feature being their location in an organ in which preservation of sensation and mobility must be our primary concern. Although the subject of numerous studies, they are not well known to the majority of practitioners, as most of these studies deal with only one type of tumour. Now, however, we have a book devoted entirely to these tumours as a whole, with a clear and logical

approach to the clinical features, histology, differential diagnosis and treatment of each type, together with an extensive bibliography. The need for such a work - one I believe to be unique of its kind - has long been felt, for tumours of the hand often raise difficult problems of diagnosis, prognosis and treatment. As regards differential diagnosis, this book is plainly very useful; it can be consulted like a classification. In recent years, diagnosis has been improved by new methods of investigation, such as thermography, scintigraphy, arteriography and serial

angiography, etc. Though very expensive, the use of these sophisticated techniques sometimes proves valuable for the diagnosis of certain bony or vascular tumours that would otherwise be difficult to approach. Such methods should not be overused; when the lesion is easily accessible, biopsy is the correct procedure. In every case, biopsy provides the only certain method of diagnosis, even though histological interpretation may be difficult and calls for great experience; the penalties of error can be very serious.
