For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Adam Steltzner is no ordinary engineer. His path to leadership was about as unlikely as they come. A child of beatnik parents, he barely made it through school. He blew off college in favour of work at a health food store and playing bass in a band, but after discovering an astonishing gift for maths and physics, he ended up helping a group of scientists land the heaviest rover in the history of space exploration on Mars. This is the story of the teamwork, drama and extraordinary feats of innovation at the Jet Propulsion Lab that culminated in that landing in 2012.

This is the only biography by a leading American poet of the great American writer, Stephen Crane. John Berryman originally wrote this book in 1950 for the distinguished "American Men of Letters" series, and revised it twelve years later. This edition reproduces the later version. In Stephen Crane, Berryman assesses the writings and life of a man whose work has been one of the most powerful influences on modern writers. As Edmund Wilson said in The New Yorker, "Mr. Berryman's work is an important one, and not merely because at the moment it stands alone...We are not likely soon to get anything better on the critical and psychological sides." It is Berryman's special insight into Crane as a poet that makes this book unique.

Local budgeting serves important functions that include setting priorities, planning, financial control over inputs, management of operations and accountability to citizens. These objectives give rise to technical and policy issues that require open discussion and debate. The format of the budget document can facilitate this debate. This book provides a comprehensive treatment of all aspects of local budgeting needed to develop sound fiscal administration at the local level. Topics covered include fiscal administration, forecasting, fiscal discipline, fiscal transparency, integrity of revenue administration, budget formats, and processes including performance budgeting, and capital budgeting.

Introduces the UNIX environment in Mac OS X and explains concepts such as the Terminal application, compiling code, creating and installing packages, and building the Darwin kernel.
