Donny Petersen, who studied privately with Harley-Davidson engineers, shares practical knowledge and street-wise tips in the fifth volume of his unauthorized guide on the best motorcycle maker in the world. Written in straightforward language, this guide can help even a motorcycle novice to become an expert mechanic by following Donnys step-by-step instructions. Whether youre looking for detailed service procedures such as fitting engine bearings or simple tips on maintenance, Donny is eager to share the expertise hes stockpiled on the Shovelhead over the last forty years. Donny shares real stories so you can find solutions to whatever is ailing your Shovelhead. Resolve teething problems, troubleshoot problematic aspects of the engine, and fix whatever comes up with various models. Gear ratios, torque multiplication, and H-D and aftermarket tools of the day are prominent in the guide, which even includes information on tools Donny invented himself to make your life easier. Get the specifications for tightening all the Shovelhead fasteners and adjustments to mechanisms on various models. In his usual forthright manner, Donny makes technical issues understandable, interspersing explanations with entertaining stories about the hard core lifestyle that comes with being a Harley rider.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

The radiation therapist's primary concern is the treatment of patients with malignant dis ease. However, there are definite indications for radiation treatment for benign diseases that do not respond to conventional methods of treatment. It may be the treatment of choice in the unusual instance of a life-threatening benign disease that cannot be surgi cally or medically managed. The present volume by Order and Donaldson represents a major statement on the uti lization of radiation techniques in the management of benign disease. The initial report of the Committee on Radiation Treatment of Benign Disease from the Bureau of Radiological Health recommended that consideration be given to the quality of radiation, the total dose, overall time, underlying organs at risk and shielding factors before the institution of radiation therapy. Infants and children should be treated with ionizing radiation only in very exceptional cases and after careful evaluation of the potential risk compared with the expected benefit. Direct irradiation of the skin areas overlying organs that are particularly prone to late effects such as the thyroid, eye, go nads, bone marrow, and breast should be avoided. Meticulous radiation protection tech niques should be used in all instances and the depth of penetration of the x-ray beam should be chosen in accordance with depth of the pathologic process'.

The universal practice of selecting and excerpting, summarizing and canonizing, arranging and organizing texts and visual signs, either in carefully dedicated types of manuscripts or not, is common to all manuscript cultures. Determined by intellectual or practical needs, this process is never neutral in itself. The resulting proximity and juxtaposition of previously distant contents, challenge previous knowledge and trigger further developments. With a vast selection of highly representative case studies – from India, Islamic Asia and Spain to Ethiopian cultures, from Ancient Christian to Coptic, and Medieval European domains – this volume deals with manuscripts planned or growing and resulting in time to comprise ‘more than one’. Whatever their contents – the natural world and related recipes, astronomical tables or personal notes, documentary, religious and even highly revered holy texts – codicological and textual features of these manuscripts reveal how similar needs received different answers in varying contexts and times.

American Motorcyclist magazine, the official journal of the American Motorcyclist Associaton, tells the stories of the people who make motorcycling the sport that it is. It's available monthly to AMA members. Become a part of the largest, most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800-AMA-JOIN.

Sometimes living under the shadow of the flashier, high-profile Triumph Twins, the equivalent BSAs were just as numerous and were exported all over the world. BSA was often seen as a less glamorous marque than Triumph or Norton, associated more with commuting and sidecars than coffee bar cowboys, but that doesn't detract from the collectibility of its models today, as the bikes have become highly usable, enjoyable classics. Unlike the many marque histories available, this book is a practical guide to buying one of these bikes. It covers the complete range, from the very first 1946 500cc A7 to the final 1973 650cc A65s. Chapters include what to look for (10min and 30min evaluations); spares prices; guides to auctions and paperwork; lists of useful contacts in the BSA community; and just as important, consideration of whether it's the right bike for you. One hundred colour photos, useful appendices and expert advice mean this book could save you thousands.

No Birds in Yesterday is a western told in the spirit of Don Quixote. The novella follows Jackson Hunter on the run from the law. Jackson, enamored with the legends of the Old West, fancies himself to be a modern incarnation of the outlaw gunslinger. He breaks away down Highway 90 in the saddle of a Harley, searching for the freedom of the early days. But in this hallowed world of outlaws and gunslingers, Jackson soon finds that the myths we have created in our history and the lives we have believed ourselves to lead must often contend with reality.

Texts of the past were often not monolingual but were produced by and for people with bi- or multilingual repertoires; the communicative practices witnessed in them therefore reflect ongoing and earlier language contact situations. However, textbooks and earlier research tend to display a monolingual bias. This collected volume on multilingual practices in historical materials, including code-switching, highlights the importance of a multilingual approach. The authors explore multilingualism in hitherto neglected genres, periods and areas, introduce new methods of locating and analysing multiple languages in various sources, and review terminology, theories and tools. The studies also revisit some of the issues already introduced in previous research, such as Latin interacting with European vernaculars and the complex relationship between code-switching and lexical borrowing. Collectively, the contributors show that multilingual practices share many of the same features regardless of time and place, and that one way or the other, all historical texts are multilingual. This book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history.

Now in its ninth year of publication, Miller's Classic Motorcycles & Price Guide 2002 goes from strength to strength. Featuring over 75 marques of motorcycle, many such as police bikes with extended features, and over 1000 photographs, the guide is an indispensable resource for both first time buyers and collectors of motorcycles. Collecting information, details of models and makers are authenticated by expert, and best-selling author, Mick Walker. Miller's Classic Motorcycles & Price Guide 2002 includes special features on Ariel, Borough Superior, Norton, Triumph and Road Racing bikes, making the Guide a reference work for price and performance of classic motorcycles. The foreword is written by King of Brands Derek Minter.
