For total preparation, use the text and Student Workbook for Health Insurance Today: A Practical Approach together! This workbook with bound-in CD contains a variety of exercises that test student understanding through simple chapter assessments and offer practice on a variety of actual health insurance billing/coding job functions. Students can test their understanding of material in the text with Defining Chapter Terms exercises and multiple choice, true/false, short answer, and fill-in-the-blank Chapter Assessments. 59 competency-based Performance Objectives activities test students on concepts in a timed, competency-based environment (including a point system and grading sheet for instructor evaluation purposes), 54 case studies, 68 critical thinking exercises, and 44 collaborative learning activities provide ample opportunities for practice, self-assessment and confidence building. 63 Projects/Discussion Topics allow instructors to assign extra projects or hold class discussions that reinforce key points. Internet Exploration assignments ask students to do further research on text content on related websites. At the end of each chapter, students can complete a Self-Evaluation to help them judge their performance. Three different options provide claims form completion practice on the CD-ROM - all tied to exercises in the workbook: Electronic Forms - Common health insurance forms in Word format provide an easy way for students to complete related workbook exercises. Students can save their work at any point -- for completion at a later date or for evaluation by their instructor. Guided Completion - For introductory purposes, select exercises in the workbook direct students to the Guided Completion option where software takes them through each block of the CMS-1500 (08-05) version, offering correction and advice at each stage. Practice Management - Certain exercises within the workbook require students to use a working demo of Altapoint practice management software, giving students valuable practice management experience.

Corresponding to the chapters in Health Insurance Today, 6th Edition, this workbook lets you practice the skills you will need to succeed as a health insurance professional. Practical assignments reinforce the information in the text, and learning activities and exercises challenge you to apply your knowledge to real-world situations. This new edition incorporates the latest information surrounding ICD-10, the Patient Protection and Affordable Care Act, and other timely federal influencers. Additionally, application exercises, critical thinking activities, and case studies allow you to apply critical thinking skills to solve a problem or answer a question. Performance objectives include hands-on, application-based learning activities with practice in areas such as completing claim forms, posting payments to a patient's ledger, filling out "Release to Return to Work" forms, and filling out Medicare appeals. Critical thinking activities strengthen your ability to apply health insurance concepts to a variety of challenging situations. Includes Stop and Think exercises which allow you to apply critical thinking skills to problem solving. Defining Chapter Terms activities help you review and understand key terms in each chapter. Chapter assessments test your knowledge of text content with multiple choice, true/false, short answer, fill-in-the-blank, and matching questions. Problem solving/collaborative (group) activities emphasize the importance of teamwork in the health care field. Case studies ask you to solve a real-world problem related to health insurance, such as completing a CMS-1500 claim form or explaining how HIPAA could affect someone recently out of work. Application exercises ask you to apply your knowledge and skills to real-world situations. In-class projects and discussion topics enhance your understanding of specific content from the text. Internet Exploration exercises in each chapter help you learn how to perform research online. NEW! Up-to-date information on all topics including key coverage of Medicare, Electronic Health Records, and Version 5010. NEW! Expanded ICD-10 coverage and removal of all ICD-9 content other than as reference material ensures you stay up-to-date on these significant healthcare system changes.

This money saving package includes Health Insurance Today, 2e Text and Virtual Medical Office.

Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital--based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million -- one in seven--working--age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

Newly revised to follow the 4th edition of Health Insurance Today, Medical Insurance Online is a practical, user-friendly online course that prepares you for a successful career as a health insurance professional. Eighteen online learning modules correspond to the 18 chapters in the text and offer short instructional segments followed by numerous application activities based on medical records from real-life case studies. You'll gain valuable experience with extracting information from the patient's chart, completing the CMS-1500, electronic claims filing, HIPAA, electronic health records, and the latest industry standards. Interactive exercises and activities - including multiple-choice, matching, short answer, image analysis, true or false, and case studies - offer multiple opportunities to recall and apply medical insurance concepts such as the cycle, organization, and completion of the claim form. Online modules correspond to each chapter of the text, making the course easier to follow. Medical records accompany training activities, challenging you to look for information in the medical record and practice abstracting relevant information from the patient's chart. An extensive glossary allows you to click on a term and read the definition at any time during the course. The text and online course connect seamlessly with engaging graphics, inviting elements, and vibrant colors, for a more interesting and educational experience. Automatically scored and graded quizzes and exams allow you to evaluate your mastery of each module's content. Clear directions help you navigate through the modules and complete the course. Reading assignments from the text for each lesson clearly connect textbook content with application and hands-on learning in the online course. Tell us what you think! At the end of the course, you'll be offered a brief survey regarding your opinion of the features and usability of the course. Your constructive feedback helps us continue to improve our online courses. Updated screens, content, and reading assignments correspond to Health Insurance Today, 4th Edition.

Risk Adjustment, Risk Sharing and Premium Regulation in Health Insurance Markets: Theory and Practice describes the goals, design and evaluation of health plan payment systems. Part I contains 5 chapters discussing the role of health plan payment in regulated health insurance markets, key aspects of payment design (i.e. risk adjustment, risk sharing and premium regulation), and evaluation methods using administrative data on medical spending. Part II contains 14 chapters describing the health plan payment system in 14 countries and sectors around the world, including Australia, Belgium, Chile, China, Columbia, Germany, Ireland, Israel, the Netherlands, Russia, Switzerland and the United States. Authors discuss the evolution of these payment schemes, along with ongoing reforms and key lessons on the design of health plan payment. Provides a conceptual toolkit that describes the goals, design and evaluation of health plan payment systems in the context of policy paradigms, such as efficiency, affordability, fairness and avoidance of risk selection Brings together international experience from many different countries that apply regulated competition in different ways Delivers a practical toolkit for the evaluation of health plan payment modalities from the standpoint of efficiency and fairness

Roughly 40 million Americans have no health insurance, private or public, and the number has grown steadily over the past 25 years. Who are these children, women, and men, and why do they lack coverage for essential health care services? How does the system of insurance coverage in the U.S. operate, and where does it fail?

The first of six Institute of Medicine reports that will examine in detail the consequences of having a large uninsured population, Coverage Matters: Insurance and Health Care, explores the myths and realities of who is uninsured, identifies social, economic, and policy factors that contribute to the situation, and describes the likelihood faced by members of various population groups of being uninsured. It serves as a guide to a broad range of issues related to the lack of insurance coverage in America and provides background data of use to policy makers and health services researchers.

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.
