While at the zoo Pat the Bunny pets the animals, from a wrinkly elephant to a feathery parrot. On board pages.

A publication of the Mediterranean Consortium for the 32nd International Geological Congress

Nearly 16, Kila Lorens obsesses over music, corduroys, and the bitter absence of her first kiss. Newly 17, Ethan Lorens, Kila's older brother, is the drummer of an indie band with secret plans. Mixing their friends together induces irreversible crushes and late-night courtship. The 67-song playlist will embed you in every intense moment.

Continental margins and their fossilized analogues are important repositories of natural resources. With better processing techniques and increased availability of high-resolution seismic and potential field data, imaging of present-day continental margins and their embedded sedimentary basins has reached unprecedented levels of refinement and definition, as illustrated by examples described in this volume. This, in turn, has led to greatly improved geological, geodynamic and numerical models for the crustal and mantle processes involved in continental margin formation from the initial stages of rifting through continental rupture and break-up to development of a new ocean basin. Further informing these models, and contributing to a better understanding of the features imaged in the seismic and potential field
