This book is the first comprehensive and integrated guide to online education. It systematically presents all aspects of the emerging "big picture" of online education, providing a broad range of information and insights from online experts, learners, teachers, developers and researchers. The book introduces readers to online education and reveals its potential for bringing about a paradigm shift in education. It describes avenues for increasing the value of the online education medium and examines techniques for improving the online student experience. It also offers a wealth of real-world examples and experiences and shares recommendations on how to improve them, provided by students, teachers, developers, and researchers. Accordingly, the book equips readers – including online learners, teachers, researchers, developers, and administrators – to optimally participate in and contribute to current and future online education advances.

Learning styles are highly relevant for students in the online environment. Designing Effective Library Tutorials provides examples of, and steps for, how to create tutorials that match learning styles, based on usability studies of students from various cultural groups and styles of learning. The book presents studies, practical suggestions, and examples to assist librarians and faculty as they develop online programs for students from diverse learning styles. Research on learning style preferences in the online environment emphasizes the need to provide a variety of methods that include text, aural, visual, and kinesthetic examples. Geared for the practitioner working in online learning, the book summarizes current literature, and presents best practices for designing effective online tools for diverse learners, including suggestions for assessment of learning objects. This title is structured into twelve chapters, covering: The learning style debate: do we need to match up learning styles with presentation styles? Overview of learning style theories and learning style results from various studies; The intersection of culture and learning styles; The need for learning object development; Current practice: categories and features of library tutorials; Effective design of learning objects; Pedagogical considerations for tutorials; Interactivity options for tutorials; Assessment of learning objects; The value and process of usability studies; Marketing learning objects for broad visibility; and a section on resources. Provides results from usability studies conducted with students that assess learning style and the resulting effectiveness of tutorials based on their preferred style. Compares approaches and software used by librarians and educators to create tutorials, along with examples of pitfalls and benefits of each for various learning styles. Incorporates examples of ways to use software while including learning objects to match learning style.
