Papa Rafa has been the Marino story keeper for more than twenty-five years. As the story keeper, he has memorized almost every leaf of the family tree back to the 1600s. More importantly, Papa Rafa is the protector of stories from the past and a collector of stories from the present. Over 250 years of stories that reveal the character of the Marino family reside in Papa Rafa's library. Within the pages of this book are some of his favorite stories. He has included the story of Great-Grandmother Pia's bravery in war, his sister Isabella's encounter with giant whales, and even his own careles adventure with a rubber raft. They are about Papa Rafa's family. The character names may be new to you, but look carefully, inside every story, you will see someone that you know or maybe even yourself. Readers are invited to visit with Papa Rafa at his virtual coffee shop and bookstore by typing <https://paparafa.com> into their Internet browser.

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.

Explains how to make a lawn safe and environmentally friendly using organic methods, and how to pick the best grass for each climate and sunlight situation.

Jury Instructions on Products Liability, Fourth Edition covers the issues likely to arise in a trial. Judges have given them, juries have followed them, and appeals courts have tested them. Each instruction cites supporting case law, including relevant law review articles and annotations to American Law Reports, to save time and effort in finding support for your request. Jury Instructions on Products Liability explains the issues for the layman, translating complex legal issues into everyday language. Tailor each instruction to fit the unique details of your case and fine-tune the issues to assert more control over jury deliberations. Jury Instructions on Products Liability includes hundreds of instructions on these and other topics: • Duty to warn • Strict products liability • Unavoidably unsafe products • Warranty liability and misrepresentation • Design defect liability • Risk-utility doctrines • Testing and inspection • Industry standards and customs • Comparative negligence • Assumption of risk • Causation The Fourth Edition also addresses the New Restatement of Torts: Products Liability.
