Complete coverage for your Subaru Legacy (10-16) & Forester (09-16):

Porsche 956 / 962 Owner's Workshop Manual is the latest addition to the “ classic racing car ” manual series, taking the series beyond ten titles, and complementing Ferrari 250 GTO, Ford GT40, Porsche 917, AC Cobra, and Ferrari 512. This highly produced manual extends coverage of iconic sports-racing cars. 2016 was the 30th anniversary of the Porsche 962's first Le Mans win (the 956 having won for the previous four years) in the hands of Derek Bell, Hans Stuck and Al Holbart.

A service and repair manual for the Land Rover series II, IIA & III.

"Lodusky" by Frances Hodgson Burnett. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten - or yet undiscovered gems - of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

This book discusses the recent advances in combustion strategies and engine technologies, with specific reference to the automotive sector. Chapters discuss the advanced combustion technologies, such as gasoline direct ignition (GDI), spark assisted compression ignition (SACI), gasoline compression ignition (GCI), etc., which are the future of the automotive sector. Emphasis is given to technologies which have the potential for utilization of alternative fuels as well as emission reduction. One special section includes a few chapters for methanol utilization in two-wheelers and four wheelers. The book will serve as a valuable resource for academic researchers and professional automotive engineers alike.

The automobile industry is one of the largest industries in India as in many other countries. It plays a major role in the growth of economy in India. The industry comprises automobiles and auto component sectors, which encompass passenger cars, two-wheel

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center
