initiative.

This book constitutes the refereed proceedings of the 12th International Conference on Passive and Active Measurement, PAM 2011, held in Atlanta, GA, USA, in March 2011. The 24 revised full papers presented were carefully reviewed and selected from 56 submissions. The papers were arranged into seven sessions covering passive measurement, wireless models, bandwidth, automated bots, route avoidance, interdomain protocols, timing, and diagnosis.

Hardware and Internet services, in and of themselves, are neutral elements of the Internet; it is how they are implemented by various countries that is repressive. Internet services are often tailored for deployment to specific countries; however, such tailoring is done to bring the company in line with the laws of that country, not with the intention of allowing the country to repress and censor its citizenry. This report provides info. regarding the role of U.S. and other foreign co. in facilitating Internet censorship by repressive regimes overseas. Sections: Examın. of repressive policies in China and Iran; U.S. laws; U.S. policies to promote Internet freedom; and Private sector initiatives. Describes technol. for censorship, and circumvention of gov't. restrictions.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." -Jonathan Yardley, The Washington Post Book World

Though often described with foreboding buzzwords such as "The Great Firewall" and the "censorship regime," Internet regulation in China is rarely either obvious or straightforward. This was the inspiration for China specialist Jason Q. Ng to write an innovative computer script that would make it possible to deduce just which terms

## Read Book Internet Censorship Papers

are suppressed on China's most important social media site, Sina Weibo. The remarkable and groundbreaking result is Blocked on Weibo, which began as a highly praised blog and has been expanded here to list over 150 forbidden keywords, as well as offer possible explanations why the Chinese government would find these terms sensitive. As Ng explains, Weibo (roughly the equivalent of Twitter), with over 500 million registered accounts, censors hundreds of words and phrases, ranging from fairly obvious terms, including "tank" (a reference to the "Tank Man" who stared down the Chinese army in Tiananmen Square) and the names of top government officials (if they can't be found online, they can't be criticized), to deeply obscure references, including "hairy bacon" (a coded insult referring to Mao's embalmed body). With dozens of phrases that could get a Chinese Internet user invited to the local police station "for a cup of tea" (a euphemism for being detained by the authorities), Blocked on Weibo offers an invaluable guide to sensitive topics in modern-day China as well as a fascinating tour of recent Chinese history.

This report documents the different ways in which companies such as Yahoo!, Microsoft, Google, and Skype are assisting and reinforcing the Chinese government's system of political censorship.

Provides an overview of the use of the Internet as a tool to deny freedom of expression in China. This briefing paper concludes that Yahoo , Microsoft and Google have conspired with the Chinese authorities to suppress dissent and challenges their actions as contradictory with their stated values and policies.

Is the Internet erasing national borders? Will the future of the Net be set by Internet engineers, rogue programmers, the United Nations, or powerful countries? Who's really in control of what's happening on the Net? In this provocative new book, Jack Goldsmith and Tim Wu tell the fascinating story of the Internet's challenge to governmental rule in the 1990s, and the ensuing battles with governments around the world. It's a book about the fate of one idea--that the Internet might liberate us forever from government, borders, and even our physical selves. We learn of Google's struggles with the French government and Yahoo's capitulation to the Chinese regime; of how the European Union sets privacy standards on the Net for the entire world; and of eBay's struggles with fraud and how it slowly learned to trust the FBI. In a decade of events the original vision is uprooted, as governments time and time again assert their power to direct the future of the Internet. The destiny of the Internet over the next decades, argue Goldsmith and Wu, will reflect the interests of powerful nations and the conflicts within and between them. While acknowledging the many attractions of the earliest visions of the Internet, the authors describe the new order, and speaking to both its surprising virtues and unavoidable vices. Far from destroying the Internet,

## Read Book Internet Censorship Papers

the experience of the last decade has led to a quiet rediscovery of some of the oldest functions and justifications for territorial government. While territorial governments have unavoidable problems, it has proven hard to replace what legitimacy governments have, and harder yet to replace the system of rule of law that controls the unchecked evils of anarchy. While the Net will change some of the ways that territorial states govern, it will not diminish the oldest and most fundamental roles of government and challenges of governance. Well written and filled with fascinating examples, including colorful portraits of many key players in Internet history, this is a work that is bound to stir heated debate in the cyberspace community.

An invaluable resource for students of law, politics, international relations and technology as well as for diplomats and civil society actors, this publication demonstrates how the Council of Europe contributes to ensuring that everyone's voice online can be heard. This is key to sustainable, human rights oriented and people-centred digitalisation. Human rights matter on the internet. Without freedom of expression, people cannot participate in everything that the information society has to offer. Yet online free speech is in danger. Between state laws, private rules and algorithms, full participation in the online communicative space faces many challenges. This publication explores the profound impact of the internet on free expression and how it can be effectively secured online. The second, updated edition of this introduction into the protection of freedom of

expression online answers essential questions regarding the extent and limits of freedom of expression online and the role of social networks, courts, states and organisations in online communication spaces. In clear language, with vivid examples spanning two decades of internet law, the authors answer questions on freedom of expression in cyberspace. Addressing issues from the protection of bloggers to the right to access online information, the publication also shows the importance of the standard-setting, monitoring and promotion activities of international and non-governmental organisations and includes a chapter on relevant national practice. It pays special attention to the role of European human rights law and the Council of Europe as this region's most important human rights organisation.
