Why has democracy failed to reduce corruption in Kenya? Framing the challenge in game theoretical terms, Dominic Burbidge examines how mutual expectations between citizens dictate the success or failure of political reforms. Since 1992, Kenya has conducted multiparty elections with the hope of promoting accountability and transparency in government. This is being undermined by ongoing corruption and an increasingly centralised state response to terrorism. Providing a nuanced assessment of democracy 's

difficult road in Kenya, Burbidge discusses the independent role being played by widespread social expectations of corruption. Through tracking average views of the average person, it is possible to identify a threshold beyond which society suffers mutually reinforcing negative social expectations. publication of the Handbook of Natural Resource and Energy Economics two decades ago. It includes chapters on individual valuation methods written by researchers responsible for fundamental advances in those methods. It also includes cross-cutting chapters that deal with aspects of welfare theory, uncertainty, experimental methods, and public health that are pertinent to valuation. Throughout the volume, attention is paid to research and policy issues that arise not only in high-income countries, where most of the theory and econometrics that underlie applied valuation methods have been developed, but also in poorer parts of the world. The volume provides a state-of-the-art reference for scholars and practitioners alike.
