Aware that many students need a careful introduction to programming and that they respond well to graphical illustration, this concise book adopts a visual approach to programming. Throughout the text, programs that use graphical images are emphasized to clearly demonstrate all the important programming principles. The authors use a spiral approach to programming concepts; introducing concepts simply early on, then in a more sophisticated way later, (e.g., objects are integrated throughout five chapters). Java for Students emphasizes the use of applets but also shows how to program free-standing applications. The authors have been careful to put together a text that covers the powerful features of Java and presents the language to students as both a fun and useful tool.

Banditry was rife around Batavia (modern Jakarta) during the late colonial period, with at least one major robbery committed every day. Banditry in West Java identifies the bandits and describes their working methods and their motives, which often went beyond simple self-enrichment. It also explores the world of the robbers' victims, city-dwellers for whom the robbers were the antithesis of civilization, convenient objects onto which respectable citizens projected their own preoccupations with sex, violence, and magic. The colonial police force in the Dutch East Indies was reformed in the early 1920s, and banditry was subsequently brought under control. However, the bandit tradition lived on in Javanese popular imagination and folk culture, not least in tales of Si Pitung, a Robin Hood figure who flourished in nineteenth-century Batavia. The author argues that banditry in Batavia was closely linked with the modernization process, particularly the ready availability of firearms and the rise of a money economy. However, her findings do little to support suggestions that banditry should be seen as part of the revolutionary struggle for independence in Indonesia. Banditry in West Java is a translation of 'Batavia bij Nacht: Bloei en ondergang van het Indonesisch roverswezen in Batavia en de Ommelanden, 1869-1942. (Amsterdam: Uitgeverij Aksant, 2006).

The growing interest in the history of Indonesia has made it desirable to have an English summary of the principal works of the Dutch historian Dr H. J. de Graaf, who in several books and articles published between 1935 and 1973 has given a description of the development of the Javanese kingdom of Mataram, based both on European and in digenous material. His works form a substantial contribution to the study of the national history of Indonesia. The Summary contains references to the paragraphs of the Dutch books and articles. This makes it easy for those readers who have a know ledge of Dutch to consult the original texts. The List of Sources for the study of Javanese history from 1500 to 1700 is composed of the lists in the summarized books and articles, and the Index of Names refers not only to the present Summary but also to the eight original texts. Many names of persons and localities in the Index have been provided with short explanatory notes and references to other lemmata as a quick way to give some provisional information on Javanese history.
