Ethan and his five co-workers are marooned in Jpod, a no-escape architectural limbo on the fringes of a massive game-design company. There they wage battle against the demands of boneheaded marketing staff who torture them with idiotic changes to already idiotic games. Meanwhile, Ethan's personal life is being invaded by marijuana grow-ops, people-smuggling, ballroom dancing, global piracy and the rise of China. Everybody in both worlds seems to inhabit a moral grey zone, and nobody is exempt, not even his seemingly strait-laced parents or Coupland himself ...

The IMF has had extensive involvement in the stress testing of financial systems in its member countries. This book presents the methods and models that have been developed by IMF staff over the years and that can be applied to the gamut of financial systems. An added resource for readers is the companion CD-Rom, which makes available the toolkit

with some of the models presented in the book (also located at [elibrary.imf.org/page/stress-test-toolkit](http://elibrary.imf.org/page/stress-test-toolkit)).

This paper reviews tools used to identify and measure interconnectedness and raises the awareness of policymakers as to potential cross-sectional implications of prudential tools aimed at controlling interconnectedness. The paper examines two sets of tools—developed at the IMF and externally—to identify the implications of interconnectedness in systemic risk and how these tools have been applied in IMF surveillance. The paper then proposes a preliminary framework to analyze some key internationally-agreed-upon and national prudential tools and finds that while many prudential tools are effective in reducing interconnectedness,

the interaction among these tools is far less clear cut.
