Upland rice around the world. Climate of upland rice regions. Soils on which upland rice is grown. Growth-limiting factors of aerobic soils. Factors that limit the growth and yields of upland rice. Varietal diversity and morpho-agronomic characteristics of upland rice. Agronomic traits needed in upland rice varieties. Drought tolerance in upland rice. Control of upland rice insects through varietal resistance. Diseases of upland rice and their control through varietal resistance. Varietal resistance to adverse chemical environments of upland rice soils. Breeding methods for upland rice. Cultural practices for upland rice. Studies on insect pests of upland rice. Pesticide residue in upland rice soil. Mineral microbial transformations in upland rice soil. Future emphasis on upland rice.

This collection of portraits has been created in the name of Teenage Cancer Trust and predominantly features those artists who have supported the charity over the years, whether taking part in the annual Royal Albert Hall shows, visiting wards, donating a multitude of gifts from signed amps to signed sunglasses or getting involved in projects such as Love Music Love Food. Artists new to the charity have become involved with the project and their relationship with Teenage Cancer Trust started here at Love Music Love Food. It's a great testament to Teenage Cancer Trust that these artists feel passionately about supporting the charity to the point that they'll be smothered in Marmite, have their knees nibbled by sheep, cuddle chickens or get pelted with Dayglo cupcakes to help make a difference. Dig in to the food that makes the stars shine - starring Brett Anderson, Johnny Borrell, Buzzcocks, Biffy Clyro, Roger Daltrey CBE, Brandon Flowers, Noel Gallagher, Ellie Goulding, Professor Green, Mick Hucknall, Kelly Jones, Alex Kapranos, Kasabian, Juliette Lewis, Madness, Mani, Brian May, Paul Oakenfold, Sir Cliff Richard, Francis Rossi OBE, Siouxsie Sioux, Sugababes, Tinie Tempah, Bullet For My Valentine, White Lies, We Are Scientists, Paul Weller, Rob Zombie & many more.

Includes special issues.

This is the first book to give a full overview on genome integrity in different species. From microorganisms to humans, this volume provides an interdisciplinary overview of how genome integrity is maintained. Written by an international panel of experts, the book addresses the connection between genome integrity and human disease.

This comprehensive introduction to Electronic Communications explores fundamental concepts and their state-of-the-art application in radio, telephone, facsimile transmission, television, satellite and fiber optic communications. It provides an explanatory as well as descriptive approach, avoids lengthy mathematical derivations and introduces the use of Mathcad for problem-solving in select areas.

A new and systematic view of how global international society (GIS) came into being and acquired its current structure and dynamics. Buzan and Schouenborg integrate states, intergovernmental and international non-governmental organisations, and the diffusion of norms, into a single theoretical framework for the study of GIS.
