The 18 revised full papers presented in this book together with an introductory survey were carefully reviewed and constitute the documentation of the Second International Workshop on Self-adaptive Software, IWSAS 2001, held in Balatonfüred, Hungary in May 2001. Self-adaptive software evaluates its own behavior and changes it when the evaluation indicates that the software does not accomplish what it is intended to do or when better functionality or better performance is possible. The self-adaptive approach in software engineering builds on well known dynamic features familiar to Lisp or Java programmes and aims at improving the robustness of software systems by gradually adding new features of self-adaption or autonomy.

Psychopath. The word conjurs up images of serial killers, rapists,

suicide bombers, gangsters. But think again: you could probably benefit from being a little more psychopathic yourself. Psychologist Kevin Dutton has made a speciality of psychopathy, and is on first-name terms with many notorious killers. But unlike those incarcerated psychopaths, and all those depicted in movies and crime fiction, most are not violent, he explains. In fact, says Prof Dutton, they have a lot of good things going for them. Psychopaths are fearless, confident, charismatic and focused--qualities tailor-made for success in today's society. The Wisdom of Psychopaths is an intellectual rollercoaster ride that combines lightning-hot science with unprecedented access to secret monasteries, Special Forces training camps, and high-security hospitals. In it, you will meet serial killers, war heroes, financiers, movie stars and attorneys--and discover that beneath the hype and popular characterization,

psychopaths have something to teach us. Like the knobs on a mixing deck, psychopathy is graded. And finding the right combination of psychopathic traits, sampled and mixed at carefully calibrated volumes, can put us ahead of the game.

THE NARROW VIEW is one of the most discussed adult and children's books of our time. Featuring a village of people and a tree, the plot focuses on both characters. The village of people live in a very uncomfortable world they have grown accustomed to. But they discover an amazing giant Red Wood tree that offers them a different and more perfect world, a protected world, a world they have always dreamed of, a comfortable world. The people of the village suddenly find themselves happier than they have ever been, until one day, something familiar begins to stir inside their inner

being. They aren't exactly sure what it is, but it is familiar. And so they gather in the shade and comfort of the giant Red Wood tree looking up at all its beauty and strength and begin making excuses. And soon the excuses turn to frustration, and the frustration turns to anger, and the anger turns to action. What follows is a very surprising and almost unpredictable reaction based on the only thing they knew, the very thing they have grown accustomed to, their very narrow view. The book is intentionally ambiguous but explodes with an incredible learning lesson of life unadorned. It is the realistic assessment of the human condition and a stark viewpoint of relationships that begin happily, but unpredictably end sadly because one partner cannot help but to destroy all that is good; a by-product or habit originating from their own dysfunctional history. The themes reside anywhere between those intended for adults and

those for children.

In 1961 the 22-year-old Mike Brown joined the New Zealand artist, Ross Crothall, in an old terrace house in inner Sydney's Annandale. Over the following two years the artists filled the house with a

remarkable body of work. Launched with an equally extraordinary exhibition, the movement they called Imitation Realism introduced collage, assemblage and installation to Australian art for the first time. Laying the groundwork for a distinctive Australian postmodernism, Imitation Realism was also the first Australian art movement to respond in a profound way to Aboriginal art, and to the tribal art of New Guinea and the Pacific region. By the mid-1960s Brown was already the most controversial figure in Australian art. In 1963 a key work was thrown out of a major travelling exhibition for being overtly sexual; a year later he publicly attacked Sydney artists and critics for having failed the test of integrity. Finally, in 1966-67, Brown became the only Australian artist to have been successfully prosecuted for obscenity. Brown spent the last 28 years of his life in Melbourne, where his reputation

for radicalism and nonconformity was cemented with his multiplicity of styles, exploration of themes of sexuality, and transgressive commitment to the ideal of street art and graffiti. Against a background of the counter-culture and the social and political upheavals of the 1960s and 1970s, Brown's art and remarkable life of personal and creative struggle is without parallel in Australian art.
