Engineering Kerala's surge in the educational front is to be viewed in the backdrop of the country's great legacy in education. India has been a major seat of learning for thousands of years. The country was home to Takshashila, the first university in the world and Aryabhama, the inventor of the digit Zero. In fact, education in Kerala has now become more value added and affordable, thanks to the pro-active initiatives of the State Government and active involvement of the private sector. Moreover, in the higher education market, Kerala has a significant edge in respect of cost which means that there would be growing influx of candidates into the state from outside the state

The fundamental idea of manufacturing or production is to create, (or produce), something that has a useful form. There are four basic production processes for producing desired shape of a product. These are casting, machining, joining (welding, mechanical fasteners, etc.), and forming processes. Casting

process exploit the fluidity of a metal in liquid state as it takes shape and solidifies in a mould. Machining processes provide desired shape with good accuracy and precision but tend to waste material in the generation of removed portions. Joining processes permit complex shapes to be constructed from simpler components and have a wide domain of applications. Forming processes exploit a remarkable property of metals, which is their ability to flow plastically in the solid state without deterioration of their properties. With the application of suitable pressures, the material is moved to obtain the desired shape with almost no wastage. This book on Manufacturing Technology will

give you a detailed understanding of manufacturing processes such as casting, joining, and forming.

The book has been completely designed as per the syllabus of the 4th semester B.Tech. in Mechanical Engineering of APJ Abdul Kalam Technological University, Kerala.
