other words, the algebra R is the completion of the semigroup algebra $GF(2)[Q_4]$ relative to the norm $2 - \deg(f)$, where $\deg(f)$ is the natural degree of an element $f \in GF(2)[Q_4]$.

(PDF) Relative Gröbner-Shirshov bases for algebras and groups

'Key to Algebra' was developed with the belief that anyone can learn basic algebra if the subject is presented in a friendly, non-threatening manner and someone is available to help when needed. Some teachers find that their students benefit by working through these books before enrolling in a regular algebra course--thus greatly enhancing their chances of success.
