It has a Kohler Command CH20 motor in it. When trying to start it will backfire extremely loud out the exhaust and sometimes will shoot fire out the carb. I've done a deep cleaning on the carb and have new fuel and plugs. It cranks over quickly and gets good spark. I did find one bent valve pushrod. And the exhaust pipes were loose from the cylinders. I've since corrected all of this. Any ...

Letter From the Editor, 2012Dear Reader,Thank you for picking up this magazine. Inside you will find a world of wonders. If you are like most people you will flick through and look at the art first. We are proud to feature gallery prints from iconic photographer Kim Weston. The art editor and I met Kim a few years ago at the Henry Miller Library over dinner, and have been trying to get his beautiful photographs in our magazine ever since. It is thanks to the dogged tenacity of River Tabor that we are able to feature work by an astounding member of the Weston dynasty.Tim Youd did an entire art exhibit based on a passage out of Henry Miller's Tropic of Capricorn. We have a poem by Big Sur visitor and raconteur Richard Brautigan. This poem seems to embody the internal landscape of the author. We are fortunate to have so many talented people in the planisphere that is the Henry Miller Memorial library, and are happy to have so many West Coast writers and artists featured in this issue. The Library is an amazing cultural venue, a local's hang out, a bookstore, a concert venue, and a film theatre, but it is also a fragile watershed. Our commitment to keeping this delicate ecosystem in check is part of why this year we have launched into our capital fundraising campaign, in an effort to retrofit Emil White's little cabin into a place that hosts such acts as Thurston Moore of Sonic Youth.I met Thurston on a damp afternoon at the library. I am not an interviewer per say, but I do love listening to people's stories. Thurston Moore and I talked about poetry and art under a persimmon tree, the interview featured herein is the fruit...The East Coast is always well

represented since half of our editors live in Brooklyn, which I like to call the poetry capital of the U.S. of A. We have the wondrous poets Leah Umansky, J. Hope Stein, Joanna Penn Cooper and Angela Wong featured Enjoy! Maria Garcia Teutsch

This field-tested prayer organizer helps Christians develop a fresher, stronger, and more exciting relationship with God. The binder format is effective and easy-to-use.

A member of the world renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. A member of the world-renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. For many years, two approaches to negotiation have prevailed: the “win-win” method exemplified in *Getting to Yes* by Roger Fisher, William Ury, and Bruce Patton; and the hard-bargaining style of Herb Cohen’s *You Can Negotiate Anything*. Now award-winning Harvard Business School professor Michael Wheeler provides a dynamic alternative to one-size-fits-all strategies that don’t match real world realities. *The Art of Negotiation* shows how master negotiators thrive in the face of chaos and uncertainty. They don’t trap themselves with rigid plans. Instead they understand negotiation as a process of exploration that demands ongoing learning, adapting, and influencing. Their agility enables them to reach agreement when others would be stalemated. Michael Wheeler illuminates the improvisational nature of negotiation, drawing on his own research and his work with Program

on Negotiation colleagues. He explains how the best practices of diplomats such as George J. Mitchell, dealmaker Bruce Wasserstein, and Hollywood producer Jerry Weintraub apply to everyday transactions like selling a house, buying a car, or landing a new contract. Wheeler also draws lessons on agility and creativity from fields like jazz, sports, theater, and even military science.

All the experience of the research team from one of the world's foremost pump manufacturers - Sulzer, featuring the latest in pump design and construction.

Straight from God's Heart Start Your Day with a Powerful Prophetic Declaration So many people—including professing Christians—live aimless, purposeless, and defeated lives without knowing who they are or what they have. This should not be the case when God has so much to say about your identity and your inheritance in Christ. Grow familiar with hearing God speak. Feel the embrace of His Presence. Listen for the Spirit's constant voice, speaking through the chaos of life. Hakeem Collins shares inspiring, prophetic encouragements that will start your day with a fresh word from Heaven. Quiet your soul and listen to hear God's voice speaking vision and victory over your life. Heaven Declares is a journey that invites the Holy Spirit to powerfully and prophetically begin your day!

“Kitty Burns Florey seems to write from a great wellspring of inner calm that derives from a gleeful appreciation of life's smallest details.” —Richard Russo, Pulitzer Prize-winning author of *Empire Falls* Once wildly popular in grammar schools across the country, sentence diagramming has fallen out of fashion. But are we that much worse for not knowing the word-mapping method? Now, in this illustrated personal history that any language lover will adore, Kitty Burns Florey explores the rise and fall of sentence diagramming, including its invention by a mustachioed man named Brainerd “Brainy” Kellogg and his wealthy accomplice Alonzo Reed ... the inferior “balloon diagram” predecessor ... and what diagrams of sentences by Hemingway, Welty, Proust, Kerouac and other famous writers reveal about them. Florey also offers up her own common-sense approach to learning and using good grammar. And she answers some of literature’s most pressing questions: Was Mark Twain or James Fenimore Cooper a better grammarian? What are the silliest grammar rules? And what’s Gertude Stein got to do with any of it?

Mechanical and electrical systems show an increasing integration of mechanics with electronics and information processing This integration is between the components (hardware) and the information driven functions (software), resulting in integrated systems called mechatronic systems The development of mechatronic systems involves finding an optimal balance between the basic mechanical structure, sensor and actuators, automatic digital information processing and control in which embedded systems play a key role
