Kon-Tiki by Thor Heyerdahl - Books on Google Play

The Kon-Tiki expedition was a 1947 journey by raft across the Pacific Ocean from South America to the Polynesian islands, led by Norwegian explorer and the author Thor Heyerdahl. The raft was named Kon-Tiki after the Incasun god, Viracocha, for whom "Kon-Tiki" was said to be an old name.

“Am going to cross Pacific on a wooden raft to support a theory that the South Sea islands were peopled from Peru. Will you come?” “Reply at once.” That is how six brave and inquisitive men came to seek a dangerous path to test a scientific theory. On a primitive raft made of forty-foot balsa logs and named “Kon-Tiki” in honor of a legendary sun king, Heyerdahl and five companions deliberately risked their lives to show that the ancient Peruvians could have made the 4,300-mile voyage to the Polynesian islands on a similar craft. On every page of this true chronicle—from the actual building of the raft through all the dangerous and comic adventures on the sea, to the spectacular crash-landing and the native islanders’ hula dances—each reader will find a wholesome and spellbinding escape from the twenty-first century.

Nomination for Best Foreign Film at the 2013 Academy Awards In English and many other languages the name 'Kon-Tiki' has become a byword for adventure and the exotic. The journey of the Kon-Tiki from Peru to Polynesia in 1947 became one of the founding myths of the postwar world. In the voyage of six Scandinavians and a parrot on a balsa raft across the Pacific Ocean the classic journey of discovery was re-invented for generations to come. Kon-Tiki spoke of heroism, masculinity, free-spirited rebellion against scientific dogmatism, and the promise of an attainable exotic world, while it updated these mythological staples to fit the times. After years of relentless media exploitation of the 101-day raft journey, Heyerdahl emerged as the protagonist in a legend that helped to create a new postwar West. A Hero for the Atomic Age tells the story of how Heyerdahl organized an expedition to sail a balsa raft from Callao in Peru to the Tuamotu Islands in French Polynesia, and explains how he turned this physical crossing into an epic narrative that became imbued with a universal appeal. The book also addresses, for the first time, the problematic nature of Heyerdahl's theory that a white culture-bearing race had initiated all the world's great civilizations.

Read Along or Enhanced eBook: Combining history with culture, the ocean with exploration, and risk with triumph—this rich offering is the only picture book account of Thor Heyerdahl's world-famous Kon-Tiki expedition, during which he sailed a raft 5,000 miles from the coast of South America to the islands of the South Pacific. Author Deborah Kogan Ray clearly and succinctly sets up how Norwegian anthropologist Heyerdahl became convinced that ancient Peruvians arrived in the South Pacific via raft, why he wanted to re-create the voyage, and how he planned for it. She uses primary-source quotations on each spread to shore up the factual history of the events portrayed in the book. Her illustrations add emotion to this harrowing journey. From the Hardcover edition.

Traces the life of the Norwegian explorer, scientist, and anthropologist, examines and explains his scientific theories, and describes his explorations, including the Kon-Tiki and Ra voyages

In English and many other languages the name «Kon-Tiki» is a byword for adventure and the exotic. The journey of the Kon-Tiki from Peru to Polynesia in 1947 became one of the founding myths of the postwar world. In the voyage of six Scandinavians and a parrot on a balsa raft across the Pacific Ocean the classic journey of discovery was re-invented for generations to come. Kon-Tiki spoke of heroism, masculinity, free-spirited rebellion against scientific dogmatism, and the promise of an attainable exotic world, while it updated these mythological staples to fit the times. After years of relentless media exploitation of the 101-day raft journey, Heyerdahl emerged as the protagonist in a legend that helped to create a new postwar West. A Hero for the Atomic Age tells the story of how Heyerdahl organized an expedition to sail a balsa raft from Callao in Peru to the Tuamotu Islands in French Polynesia, and explains how he turned this physical crossing into an epic narrative that became imbued with a universal appeal. The book also addresses the problematic nature of Heyerdahl's theory that a white culture-bearing race had initiated all the world's great civilizations.

Now a major motion picture, Kon-Tiki is the record of Thor Heyerdahl's astonishing three-month voyage across the Pacific. Kon-Tiki is the record of an astonishing adventure -- a journey of 4,300 nautical miles across the Pacific Ocean by raft. Intrigued by Polynesian folklore, biologist Thor Heyerdahl suspected that the South Sea Islands had been settled by an ancient race from thousands of miles to the east, led by a mythical hero, Kon-Tiki. He decided to prove his theory by duplicating the legendary voyage. On April 28, 1947, Heyerdahl and five other adventurers sailed from Peru on a balsa log raft. After three months on the open sea, encountering raging storms, whales, and sharks, they sighted land -- the Polynesian island of Puka Puka. Translated into sixty-five languages, Kon-Tiki is a classic, inspiring tale of daring and courage -- a magnificent saga of men against the sea. Washington Square Press' Enriched Classics present the great works of world literature enhanced for the contemporary reader. This edition of Kon-Tiki has been prepared by an editorial committee headed by Harry Shefter, professor of English at New York University. It includes a foreword by the author, a selection of critical excerpts, notes, an index, and a unique visual essay of the voyage.

"The voyage of Kon-Tiki just two decades ago was one of the great true adventures of our century. For its daring leader, Thor Heyderahl, this expedition was the turning point of a life already crowded with excitement. Now, overnight, he was an international celebrity-- but a man half-observed by the shadow of his own achievement. Millions new his name, but few knew the man behind the voyage. In this definitive biography, Arnold Jacoby focuses on that man. He tells of Heyerdahl's boyhood youth, of the experimental year when he and his bride returned to nature on a remote Pacific island to see if modern man was better off than primitive man, and of his wartime experiences in the Free Norwegian Army. One theme recurs throughout those years: Heyerdahl's growing conviction that accepted scientific opinion

about the origins of the South Sea islanders was incorrect. But his own theories brought only scorn from the scientific community-- until he set out to prove himself right in the only way possible, by recreating the Pacific voyage he knew must once have take place. The Kon-Tiki and subsequent expeditions to Easter Island and the Galapagos won Heyerdahl renown and, perhaps more importantly, scientific respect. The behind-the-scenes stories of these achievements and thier aftermath, are all part of this fascinating book."--inside jacket.
