Sources of State Practice in International Law is bibliography of treaty and diplomatic sources for important jurisdictions around the world. It also includes a summary for each jurisdiction of issues related to treaty succession and treaty implementation in municipal law.

Introduced in 2008, the UN Convention on the Rights of Persons with Disabilities has existed for nearly a decade. This comprehensive study examines how courts in thirteen different jurisdictions make use of the Convention. The first sustained comparative international law analysis of the CRPD, Waddington and Lawsons ground breaking text illuminates the intersection between human rights law, disability law and international law through an examination of the role of courts. The first part of the book contains chapters specific to each jurisdiction. The second part consists of comparative chapters which draw on the rich analysis of the jurisdiction-specific chapters. These chapters reflect on emerging patterns of judicial usage and interpretation of the CRPD and on the wider implications for human rights theory and the nascent field of international comparative human rights law. This volume is a vital and thought-provoking addition to the literature on comparative international law and disability rights.

Leviathan or The Matter, Forme and Power of a Common-Wealth Ecclesiastical and Civil is a book written by an English materialist philosopher Thomas Hobbes about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man.

Hobbes uses this character to describe a powerful state (“God of the death”). He starts with a postulate about a natural human state (“the war of all against all”) and develops the idea “man is a wolf to a man”. When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights – to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.

This book advocates, and develops, a critical account of the relationship between law and the largely neglected issue of ‘enjoyment’. Taking popular culture seriously – as a lived and meaningful basis for a wider understanding of law, beyond the strictures of legal institutions and professional practices – it takes up a range of case studies from film and literature in order to consider how law is iterated through enjoyment, and how enjoyment embodies law. Drawing on psychoanalytic theory, this book addresses issues such as the forced choice to enjoy the law, the biopolitics of tyranny, the enjoyment of law’s contingency, the trauma of the law’s symbolic codification of pleasure, and the futuristic vision of law’s transgression. In so doing, it forges an important case for acknowledging and analyzing the complex relationship between power and pleasure in law – one that will be of considerable interest to legal theorists, as well as those with interests in the intersection of psychoanalytic and cultural theory.
