That is about to change, because Grade 12 Mathematical Literacy Mobile Application is here to change all that. This app has activities that will take you through step-by-step the basic concepts of each chapter, while at the same time you can view the solutions when working on each ...

At the dawn of the last century, leading scientists and politicians giddily predicted that science—especially Darwinian biology—would supply solutions to all the intractable problems of American society, from crime to poverty to sexual maladjustment. Instead, politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines. In criminal justice, these experts denied the existence of free will and proposed replacing punishment with invasive "cures" such as the lobotomy. In welfare, they proposed eliminating the poor by sterilizing those deemed biologically unfit. In business, they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior. In sex education, they advocated creating a new sexual morality based on "normal mammalian behavior" without regard to longstanding ethical and religious imperatives. Based on extensive research with primary sources and archival materials, John G. West 's captivating Darwin Day in America tells the story of how American public policy has been corrupted by scientific ideology. Marshaling fascinating anecdotes and damning quotations, West 's narrative explores the far-reaching consequences for society when scientists and politicians deny the essential differences between human beings and the rest of nature. It also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong. West concludes with a powerful plea for the restoration of democratic accountability in an age of experts.

Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

In Grading Justice: Teacher-Activist Approaches to Assessment, new and seasoned teachers are invited to engage with socially-just approaches of assessment, including practices aimed at resisting and undoing grading and assessment altogether, to create more democratic grading practices and policies, foregrounding the transformative potential of communication within their courses. The contributions in this collection encourage readers to consider not only how educators might assess social justice work in and beyond the classroom, but also to imagine what a social justice approach to grading and assessment would mean for intervening into unjust modes of teaching and learning. Educators wishing to explore critical modes of grading and assessment, grounded in social justice, will find this book a timely and relevant pedagogical guide for their teaching and scholarship.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.
