Rod set out to create a new kind of owner's workshop manual--friendly, easy to understand, yet more detailed than any other manual: this book is the result. Rod stripped down an MX-5 ('Miata' USA/'Eunos' Japan) in a domestic garage using ordinary tools and, in the process, took over 1500 step-by-step photographs. The result is a superbly detailed text which passes on to the reader every detail of important jobs, including how problems can be overcome without resorting to special tools.

The inclination towards two wheelers is not newer to the world. From the very beginning, two wheelers are recognized as a mark of triumph, independence and joy. These are considered fast, safe and easy mode of transportation with worthy fuel economy. With the arrival of automation and electronics in two wheelers, the study gained more momentum, which led Two and Three Wheeler Technology to emerge as a new discipline of automobile engineering. The book explains traditional and modern technologies in an easy to understand manner. Various technologies have been explicated with appropriate 2D and 3D diagrams to support learning. Text comprises the state-of-the-art developments in the field of two wheelers. Detailed explanation on the actual assemblies helps the students to cognize the technology systematically. Although the emphasis has been given to the two wheeler technology, considering the requirement of various syllabi, the last chapter is solely dedicated to three wheeler technology. Chapter-end review questions help students in preparing them for examination by self-assessment method. Primarily designed for the undergraduate and diploma students of automobile engineering, the lucid and simple presentation of the book makes it useful for the commoner, who has keen interest in this area. It is a useful guide for a vehicle owner for understanding mechanism and parts, which may help him in maintaining his vehicle at best efficiency.

The book presents the proceedings of four conferences: The 26th International Conference on Parallel and Distributed Processing Techniques and Applications (PDPTA'20), The 18th International Conference on Scientific Computing (CSC'20), The 17th International Conference on Modeling, Simulation and Visualization Methods (MSV'20), and The 16th International Conference on Grid, Cloud, and Cluster Computing (GCC'20). The conferences took place in Las Vegas, NV, USA, July 27-30, 2020. The conferences are part of the larger 2020 World Congress in Computer Science, Computer Engineering, & Applied Computing (CSCE'20), which features 20 major tracks. Authors include academics, researchers, professionals, and students. Now in its 17th year, the NILOS Documentary Yearbook provides the reader with an excellent collection of documents related to ocean affairs and the law of the sea, issued each year by organizations, organs and bodies of the United Nations system. Documents of the UN General Assembly and Security Council, Meeting of States Parties to the UN Law of the Sea Convention, CLCS, ISBA, ITLOS, Follow-ups to the UN Fish Stocks and Small Island States Conferences, WSSD, ECOSOC, UNEP and UNCTAD are reproduced first, followed by the documents of FAO, IAEA, IMO and NESCO/IOC. As in the previous volumes, documents which were issued in the course of 2001 are reproduced while other relevant documents are listed. The NILOS Documentary Yearbook has proved to be of invaluable assistance in facilitating access of the international community of scholars and practitioners in ocean affairs and the law of the sea to essential documentation. The entry of the 1982 UN Law of the Sea Convention into force in 1994 and of the Part XI Agreement in 1996, as well as of the UN Fish Stocks Agreement in 2001, coupled with the review of the UNCED Agenda 21 the 2002 Johannesburg World Summit, make continuation of this assistance of particular significance in the years to come. The members of the Yearbook's Advisory Board are: Judges Abdul Koroma and Shigeru Oda of the ICJ, UNDOALOS Director Mrs. Annick de Marffy, ITLOS President Dolliver Nelson and Judges Thomas Mensah and Tullio Treves, as well as Rosalie Balkin, Edward Brown, Bernard Oxman and Shabtai Rosenne.
