~~The Texas Gulf Coast is one of the most outstanding birding locations in North America. From whooping cranes to sandhill cranes, ducks, geese, raptors and the hundreds of song birds that migrate every year to the Texas Gulf make this a birder's paradise. There are numerous public sites that make for easy birding. Each year, during the last week of February, there is a Whooping Crane Festival in Port Aransas and Mustang Island that attracts thousands of birders. It features workshops, demonstrations, speakers, and many guided birding trips to local birding locations. Jim Foster is a noted birder. He describes each birding trail with a list of key birds, the best time of year to visit each trail, the type of terrain, size, and complete directions to each area, many with maps of each trail. Texas is one of the four best birding states in the U.S. with over 2.5 million resident birders and thousands of non-resident birders who visit the state each year. Currently there are over 51 million birders in the United States and over 20 million travel out of their state each year to view birds. Birding Trails Texas: Gulf Coast is a must book for all birders.~~

~~This report summarizes the results of a study of processes affecting Pleasure Island, Texas, an 18-mile-long island separating Sabine Lake from the Sabine-Neches Waterway at Port Arthur, Texas. Wave, current, and meteorological data collected during the summer of 1982 and the winter of 1982-83 were analyzed to assess the relative contributions of man-made and natural processes contributing to Pleasure Island shoreline erosion. A summary of processes affecting erosion is presented, as are wave height distribution tables. Ship wakes were found to be the primary long-term cause of the continuing erosion of unstable bank material, although extreme natural events may also play a role.~~

~~Step into the past in this visual history of Carolina Beach in North Carolina through the lens of over 200 vintage images. Federal Point was once the name of a peninsula 15 miles south of Wilmington, bounded by the Cape Fear River, the Myrtle Grove Sound, and the Atlantic Ocean. Fort Fisher, Kure Beach, Carolina Beach, and Seabreeze now line its sandy shores. Fort Fisher played a pivotal role in the Civil War, and when it fell in 1865, the Confederacy lost its last supply line. A century later, the Fort Fisher Hermit became a local legend, teaching a litany of common sense and simplicity to legions of visitors. Carolina Beach and Kure Beach suffered a spate of fires and hurricanes that destroyed amusement park rides, arcades, and especially fishing piers. Seabreeze was an all-black resort during the Jim Crow era, and its greatest legacy is the R&B music and dance of the 1940s that gave rise to today's ever-popular beach music and shag dancing. The Army Corps of Engineers created Snow's Cut in 1930, connecting the river to the sound and turning the peninsula into an island that is now known as Pleasure Island.~~

~~The vital statistics are included in the annual report.~~
