What do younger generations know about the terrible tragedy that shook America and the world on September 11, 2001? In this gripping documentary work by journalist Baptiste Bouthier and illustrator Heloïse Chochois, we first learn about the historic day from several inside perspectives. In the second half, the authors take stock of 9/11 in the days, weeks, and years that followed, from traumatized America to George W. Bush's crusade against the "axis of evil." A not-be-missed piece of graphic non-fiction, published 20 years after the events in question.

When Zapsky and Byro meet during a right-wing nationalist march, their joint escape from the police results in an unexpected and violent outburst of passion. Their initial euphoria quickly turns into doubt and fear—after all, if their buddies found out about them, the consequences would be terrible... But now that they've come together, will they be able to simply forget and move on with their lives? Or is it something more lasting, despite the risk it represents for both? "Nationalist Love" is

An authorised reissue of the long out of print classic textbook, Advanced Calculus by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a

text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention Differential and Integral Calculus by R Courant, Calculus by T Apostol, Calculus by M Spivak, and Pure Mathematics by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

machistes des rédacteurs en chef, Juliette n'abandonne pas son rêve de devenir grand reporter et le journal Horizon France lui donne l'occasion de montrer sa valeur en l'engageant comme stagiaire de Daniel Fraiser, journaliste aguerrri mais particulièrement désagréable. Gustave Noirhomme, lui, est prêt à tout pour que Juliette cède ses parts aux nazis... Avec "Mademoiselle J", Yves Sente et Laurent Verron font du XXe siècle une passionnante épopée !

Jean is a medical student who's about to start her final residency rotation in gynecology. But she'd much rather practice surgery than listen to simpering women moan about their problems all day. Plus, this department is headed by the notorious Dr. Karma, renowned throughout the hospital for his stubborn mindset and unorthodox practices. However, in her first week, Jean begins to realize that Dr. Karma's reputation isn't fully accurate, and, perhaps, the complexities of women's stories are worth listening to and respecting. A modern classic of a revolution in women's medical care, adapted from the bestselling novel by Martin Winckler.
