For Electrical Engineering courses in analog layout or professional layout designers. This text covers the issues involved in successfully laying out analog integrated circuits. Hastings provides clear guidance and does not stress theoretical physics or mathematical analysis of layouts. He emphasizes cross-sections of devices and carrier-based models of device operation as compared to the more common geometric and schematic representation of devices.

Oceanography and Marine Biology preserves the basic elements of the physical, chemical, and geological aspects of the marine sciences, and merges those fundamentals into a broader framework of marine biology and ecology. I have found that this approach works: my class of 350 students fills every semester it is offered, with students on waiting lists to get in. But existing textbooks on oceanography or marine biology address the companion field only cursorily: very few pages in oceanography texts are devoted to marine biology, and vice versa. This new book overcomes that imbalance, bringing these disparate marine science text formats closer together, giving them more equal weight, and introducing more effectively the physical sciences by showing students with everyday examples how such concepts form the foundation upon which to build a better understanding of the marine environment in a changing world.

A new edition of a timeless classic Picture Book from 1881. This book which tells its stories in pictures is a precursor to the comic books of the 1900's. Its quaint and charming wood cut pictures of Victorian romance and adventure have been recolored using modern methods. Stories include "The Steeple Chase". "My Grandfather's first recollections" "Kate Greenaway's Christmas" and "My Grandmothers Wedding"

Another thrilling saga in the Supreme Constellations romantic sci-fi adventure series. Environmental activist Dwyn Izonro and law enforcement officer Emeron D'Artansis instinctively dislike everything about each other, even though the attraction between them is unmistakable. While Dwyn surveys an endangered region of a remote planet with Emeron as her security escort, Ambassador M'Ekar has bribed his guards to facilitate his escape from the planet where he is incarcerated. As part of his escape plan, he kidnaps one of the individuals he holds responsible for his humiliation, Dahlia Jacelon. When a spacecraft carrying unexpected cargo crashes to the surface in the region where Dwyn and Emeron are working, the two women are unexpectedly hurled into a search and rescue mission where the fate of millions rests on their ability to work together. The stakes go up when Rae Jacelon and Kellen O'Dal, the Protectors of the

Theodore Kallman illuminates the brief life of a Christian socialist community founded by four men—a minister, an editor, a professor, and an engineer—on a worn-out cotton plantation just outside Columbus, Georgia, in 1896. Inspired by primitive Christianity, postmillennial optimism, and American democracy, its courageous, yet naïve, members labored for over four years to achieve their goal, the “Kingdom of God” on earth. Radical by some perspectives, they were emulating two great traditions: the apostolic Christianity of the followers of Christ and the Puritan desire to found a “city upon the hill.” Kallman explains how Christ’s Sermon on the Mount and the anarchism of Leo Tolstoy took root in west-central Georgia and attracted worldwide attention, including that of Tolstoy and Jane Addams. Their experiment was unique, but they joined thousands of disgruntled Americans who sought to challenge the Gilded Age’s unfettered capitalism. Although the Christian Commonwealth only lasted until 1901, its combination of religious communitarianism and socialist ideology proved attractive to many during its existence. They did not realize their hope for social salvation, but for many, personal regeneration brought on by love and sacrifice led them to further endeavors in pursuit of a more humane world. In Kallman’s capable hands, what appears to be a minor blip on the

history of Georgia and radical thought in the United States instead emerges as a story that teaches us much about Gilded Age America and provides a necessary context for the surging interest in America's socialist past.

The shifting demographic toward a "graying" population -- coupled with today's reality of managed care -- makes the need for high-quality, cost-effective psychiatric services within the nursing care setting more urgent than ever. As we increase the number of our years, it is also imperative that we enhance the quality of those years. The product of the American Psychiatric Association's (APA's) Council on Aging and its Committee on Long-Term Care and of the Elderly, the Manual of Nursing Home Practice for Psychiatrists stands out because it focuses on the "how" -- not the "why" -- of nursing home care. Of exceptional importance is its detailed discussion of the Minimum Data Set (MDS), a structured assessment required by both Medicare and Medicaid for all residents of skilled nursing facilities. Divided into six sections, this "how to" volume contains practical information readers can use right away, from getting reimbursed by insurance companies to handling nursing facility politics: Clinical -- History; evaluation and management of psychiatric problems in long-term care patients; an overview of the MDS; sexuality within the nursing home care setting Regulatory -- Introduction to the

BETWEEN HEAVEN AND HELL, MAN AND DEMON, SHE'S ABOUT TO FACE THE ONE THING SHE MAY NOT BE ABLE TO SURVIVE. Welcome to the world of Kara Gillian, a cop with a gift. Not only does she have the power of "othersight" to see what most people can't even imagine, but she's become the exclusive summoner of a demon lord. Or maybe it's the other way around. The fact is, with two troublesome cases on her docket and a handsome FBI agent under her skin, Kara needs the help of sexy, insatiable Lord Rhyzkahl more than he needs her. Because these two victims, linked by suspicious coincidence, haven't just been murdered. Something has eaten their souls. It's a case with roots in the arcane, but whose evil has flowered among the rich, powerful, and corrupt in Beaulac, Louisiana. And as the killings continue, Kara soon realizes how much there's still to learn about demons,

men, and things that kill in the night—and how little time she has to learn it.

When she takes over her uncle's law firm in Savannah, Brianna Winston Beaufort, renting space in an old house located in the middle of an all-murderers' cemetery, gets a call from beyond from a murdered local businessman who needs her help. Original.

Winner of the 2010 Shirley Jackson Award, nine stories of cosmic horror from the heir apparent to Lovecraft's throne. Laird Barron has emerged as one of the strongest voices in modern horror and dark fantasy fiction, building on the eldritch tradition pioneered by writers such as H. P. Lovecraft, Peter Straub, and Thomas Ligotti. His stories have garnered critical acclaim and have been reprinted in numerous year's best anthologies and nominated for multiple awards, including the Crawford, International Horror Guild, Shirley Jackson, Theodore Sturgeon, and World Fantasy awards. His debut collection, *The Imago Sequence and Other Stories*, was the inaugural winner of the Shirley Jackson Award. He returns with his second collection, *Occultation*. Pitting ordinary men and women against a carnivorous, chaotic cosmos, *Occultation's* nine tales of terror (two published here for the first time) were nominated for just as many Shirley Jackson awards, winning for the novella "Mysterium Tremendum" and the collection as a whole.

Featuring an introduction by Michael Shea, Occultation brings more of the spine-chillingly sublime cosmic horror Laird Barron's fans have come to expect. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.
