Are you looking for new ways to help your children learn math? In a math journal, children explore their own ideas about numbers, shapes, and patterns through drawing or writing in response to a question. Journaling encourages students to develop a rich mathematical mindset. They begin to see connections and make sense of math concepts. They grow confident in their ability to think through new ideas. All they need is a piece of paper, a pencil, and a good prompt to launch their mathematical journey. 312 Things To Do with a Math Journal includes number play prompts, games, math art, story problems, mini-essays, geometry investigations, brainteasers, number patterns, research projects, and much more. These activities work at any grade level, and most can be enjoyed more than once. It doesn't matter whether your students are homeschooled or in a classroom, distance-learning, or in person. Everyone can enjoy the experience of playing around with math. Early Reviews from My Journaling Beta-Testers: "We really enjoyed these!" "I remember doing pages and pages of dull equations with no creativity or puzzle-thinking, but now as a homeschool mom, I'm actually enjoying math for the first time! My daughter's math skills have skyrocketed and she always asks to start homeschool with math." "Thank you for a great intro to Playful Math!" "All of the kids were excited about their journals. My oldest kept going without prompting and did several more pages on his own." "We had a lot of fun doing your math prompts. We had never done any math journaling before, but we will certainly integrate this into our weekly routine from now on." Pick up a copy of 312 Things To Do with a Math Journal and begin your family's math journaling adventure today.

A growth mindset journal for students grades 4th-8th.

Discusses how writing can improve student's reasoning skills.

Suggests writing prompts to encourage students in grades 2-4 to write about their math thinking.

To help students communicate their mathematical thinking, many teachers have created classrooms where math talk has become a successful and joyful instructional practice. Building on that success, the ideas in Why Write in Math Class? help students construct, explore, represent, refine, connect, and reflect on mathematical ideas. Writing also provides teachers with a window into each student's thinking and informs instructional decisions. Focusing on five types of writing in math (exploratory, explanatory, argumentative, creative, and reflective), Why Write in Math Class? offers a variety of ways to integrate writing into the math class. The ideas in this book will help you make connections to what you already know about the teaching of writing within literacy instruction and build on what you've learned about the development of classroom communities that support math talk. The authors offer practical advice about how to support writing in math, as well as many specific examples of writing prompts and tasks that require high-cognitive demand. Extensive stories and samples of student work from K-5 classrooms give a vision of how writing in math class can successfully unfold.

ABSTRACT: This qualitative research study documents the observed and reported experiences of fourth grade math students and their teacher when math journals are implemented in their curriculum to increase student understanding and motivation to write in math class. In this study, the teacher explored the process of designing journal prompts, establishing a routine in the classroom where these journal prompts were completed, and fostering motivation within the students to adapt to this new classroom routine. The author designed the study so that the students saw a purpose for each prompt, engaged the students in writing and sharing, and provided opportunities for students to work collaboratively using their journal entries. In order to maintain complete journal prompts, the author established a routine for writing, a connection to content being taught with journal prompts, and assistance when students needed prompting for their entries. The teacher engaged in dialogue with the students through the journals as well as feedback during group observations. The author discovered many of these implementations to be successful for the students in the classroom. Since the classroom contained a variety of diverse learners with different learning styles and needs, the author found that some students had different strategies that enabled them to be successful with their writing.
