The Mader/Windelspecht Story: Biology is a comprehensive introductory biology textbook for non-majors or mixed-majors courses that covers biology in a traditional order from the structure and function of the cell to the organization of the biosphere. The book, which centers on the evolution and diversity of organisms, is appropriate for a one- or two-semester course. The eleventh edition is the epitome of Mader's expertise: Its concise, precise writing uses an economy of words to present the material as succinctly and clearly as possible, thereby enabling students -- even non-majors -- to understand the concepts without necessarily asking the instructor to explain further. Sylvia Mader represents one of the icons of science education. Her dedication to her students, coupled with her clear, concise writing style has benefited the education of thousands of students over the past three decades. Dr. Michael's Windelspecht: The integration of text and the digital world are now complete with the addition of Michael's Windelspecht's expertise in the development of digital learning assets. For over ten years, Michael served as the Introductory Biology Coordinator at Appalachian State University, in Boone NC where he directed a program that enrolls over 4,500 non-science majors annually. Michael has acted as the leading architect in the design of the Mader media content for McGraw-Hill's ConnectPlus and LearnSmart. These assets allow instructors to easily design interactive tutorial materials, enhance presentations in both the online and traditional environments, and assess the learning objectives and outcomes of your course. Users who purchase Connect Plus receive access to the full online ebook version of the textbook.

Biology's focus on inquiry-based learning coupled with its precise writing style, hallmark art program, and integration of text and digital make it the perfect solution for today's AP Biology classroom. Mader's Biology program also provides valuable supplemental materials to help aid student success in the AP Biology Course (sold separately). Biology begins with an introductory chapter that helps to familiarize students with the AP Biology Curriculum by explaining each Big Idea through the use of thought provoking examples. This chapter also introduces students to the science practices to students and reviews the process of science. Each Unit Opener has been written to pinpoint how the chapters in the Unit relate to the AP Curriculum and the Big Ideas while each chapter opener provides the students with Essential Questions to help guide their reading. The features within the text contain content focused either on one of the AP Big Ideas or on the Nature of Science. Includes: Print Student Edition.

Biology for AP® courses covers the scope and sequence requirements of a typical two-semester Advanced Placement® biology course. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. Biology for AP® Courses was designed to meet and exceed the requirements of the College Board's AP® Biology framework while allowing significant flexibility for instructors. Each section of the book includes an introduction based on the AP® curriculum and includes rich features that engage students in scientific practice and AP® test preparation; it also highlights careers and research opportunities in biological sciences.

NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value--this format costs significantly less than a new textbook. The Eleventh Edition of the best-selling text Campbell BIOLOGY sets you on the path to success in biology through its clear and engaging narrative, superior skills instruction, and innovative use of art, photos, and fully integrated media resources to enhance teaching and learning. To engage you in developing a deeper understanding of biology, the Eleventh Edition challenges you to apply knowledge and skills to a variety of NEW! hands-on activities and exercises in the text and online. NEW! Problem-Solving Exercises challenge you to apply scientific skills and interpret data in the context of solving a real-world problem. NEW! Visualizing Figures and Visual Skills Questions provide practice interpreting and creating visual representations in biology. NEW! Content updates throughout the text reflect rapidly evolving research in the fields of genomics, gene editing technology (CRISPR), microbiomes, the impacts of climate change across the biological hierarchy, and more. Significant revisions have been made to Unit 8, Ecology, including a deeper integration of evolutionary principles. NEW! A virtual layer to the print text incorporates media references into the printed text to direct you towards content in the Study Area and eText that will help you prepare for class and succeed in exams--Videos, Animations, Get Ready for This Chapter, Figure Walkthroughs, Vocabulary Self-Quizzes, Practice Tests, MP3 Tutors, and Interviews. (Coming summer 2017). NEW! QR codes and URLs within the Chapter Review provide easy access to Vocabulary Self-Quizzes and Practice Tests for each chapter that can be used on smartphones, tablets, and computers.

Committed to Excellence in the Eleventh Edition. This edition continues the evolution of Raven & Johnson's Biology. The author team is committed to continually improving the text, keeping the student and learning foremost. The integrated pedagogical features expand the students' learning process and enhance their learning experience. This latest edition of the text maintains the clear, accessible, and engaging writing style of past editions with the solid framework of pedagogy that highlights an emphasis on evolution and scientific inquiry that have made this a leading textbook for students majoring in biology. This emphasis on the organizing power of evolution is combined with an integration of the importance of cellular, molecular biology and genomics to offer our readers a text that is student friendly and current. Our author team is committed to producing the best possible text for both student and faculty. The lead author, Kenneth Mason, University of Iowa, has taught majors biology at three different major public universities for more than fifteen years. Jonathan Losos, Harvard University, is at the cutting edge of evolutionary biology research, and Susan Singer, Carleton College, has been involved in science education policy issues on a national level. All three authors bring varied instructional and content expertise to this edition of Biology.
