This is a great general overview of European history from the fall of the Roman Empire to the beginning of the Renaissance. It's a breeze to read, it isn't written in a stodgy style, and it does exactly what the author intends it to do: show that, rather than being a period of stagnation and ignorance, Medieval Europe was filled with innovations in art, writing, and architecture.

"Medieval Europe - A Short History" by Charles Warren Hollister, © 1990, 1982, 1978, 1974, 1968, 1964. This book is an amazing little textbook. I was pleased to read the explanation of the growth and development of modern European nations. The most surprising part is the growth of civilization throughout the time we were taught were the Dark Ages.

Medieval Europe - Judith M. Bennett; Sandy Bardsley ...

Out of my modest library of a dozen or so books on the period, "Medieval Europe, A Short History" is the one that I would recommend to use as a general introduction. I give it four stars because I believe that the highest ranking should be reserved for works of unparalleled insight and expression.

Medieval Europe: A Short History: Hollister, C. Warren ...

For five decades, Medieval Europe: A Short History has been the best-selling text for courses on the history of Medieval Europe. This acclaimed book has long been applauded for both its scholarship and its engaging narrative. Oxford University Press is pleased to continue this tradition of excellence with a new, affordable, and streamlined twelfth edition featuring a new coauthor, Sandy Bardsley.

For more than three decades, C. Warren Hollister nurtured this classic text of Medieval European History, which was profoundly marked by his clear historical vision and engaging teaching style. The ninth edition seeks to introduce today's students to the medieval roots of our own society. Judith Bennett has updated this classic book while striving to lose neither the vision nor the style of the original. She brings to this revision expanded coverage of women's history, social and cultural history, the role of the common man and woman of the Middle Ages, and the history of the Late Middle Ages.

R.C. Davis provided the classic account of the European medieval world; equipping generations of undergraduate and "A" level students with sufficient grasp of the period to debate diverse historical perspectives and reputations. His book has been important grounding for both modernists required to take a course in medieval history, and those who seek to specialise in the medieval period. In updating this classic work to a third edition, the additional author now enables students to see history in action; the diverse viewpoints and important research that has been undertaken since Davis' second edition, and progressed historical understanding. Each of Davis original chapters now concludes with a "new directions and developments" section by Professor RI Moore, Emeritus of Newcastle University. A key work updated in a method that both enhances subject understanding and sets important research in its wider context. A vital resource, now up-to-date for generations of historians to come.

In this newest edition of her bestselling book, Barbara H. Rosenwein integrates the history of European, Byzantine, and Islamic medieval cultures—as well as their Eurasian connections—in a dynamic narrative. The text has been significantly updated to reflect growing interest in the Islamic world and Mediterranean region. Stunning plates featuring art and architecture weave together events, mentalities, and aesthetics. Medievalist Riccardo Cristiani authors a new feature on material culture that examines the intricacies of manuscript production and the lustrous glazes of Islamic ceramics. A fully revised map program offers user-friendly spot maps that clarify events right where they are discussed as well as dazzling topographical maps that reveal the very contours of the medieval world. Helpful genealogies, figures, architectural plans, and lists of key dates complement the text. All maps, genealogies, and figures are available on the History Matters website ([www.utphistorymatters.com](http://www.utphistorymatters.com)) for easy download. Students will find this site equally useful for its hundreds of study questions and their click-to-reveal answers.

This collection of documents in medieval history is designed to accompany the recently revised MEDIEVAL EUROPE: A SHORT HISTORY by C. Warren Hollister and Judith Bennett. However the diverse selection of sources also makes it a useful supplement for courses in Western Civilization. As in previous editions, this reader continues to provide a lucid and approachable introduction to each of the documents and a special chapter devoted to visual sources in medieval history. In addition to these hallmark features, the fourth edition includes new Internet resources, thought questions at both the reading and chapter level, and a more geographically diverse range of readings.

Roman Empire and the Reformation was a long and hugely transformative period—one not easily chronicled within the scope of a few hundred pages. Yet distinguished historian Chris Wickham has taken up the challenge in this landmark book, and he succeeds in producing the most riveting account of medieval Europe in a generation. Tracking the entire sweep of the Middle Ages across Europe, Wickham focuses on important changes century by century, including such pivotal crises and moments as the fall of the western Roman Empire, Charlemagne's reforms, the feudal revolution, the challenge of heresy, the destruction of the Byzantine Empire, the rebuilding of late medieval states, and the appalling devastation of the Black Death. He provides illuminating vignettes that underscore how shifting social, economic, and political circumstances affected individual lives and international events—and offers both a new conception of Europe's medieval period and a provocative revision of exactly how and why the Middle Ages matter. "Far-ranging, fluent, and thoughtful" of considerable interest to students of history writ large, and not just of Europe. Kirkus Reviews, (starred review) Includes maps and illustrations

In this text the author provides an account of the centuries during which Europe changed from being an abstract geographical expression into a new, culturally coherent, if politically divided, entity. It examines how the social, economic and cultural structures of Antiquity were replaced by their medieval equivalents and also seeks to define the European context, by looking at those external forces, such as the nomadic confederacies of Central Asia and the Islamic empire of the Arabs, which helped to shape it through conflict.

Inleiding in de geschiedenis van de Middeleeuwen.

This is the most authoritative account of life in Medieval Europe between the fall of the Roman Empire and the coming of the Renaissance. Full coverage is given to all aspects of life in a thousand-year period which saw the creation of western civilization: from the empires and kingdoms of Charlemagne, the Byzantines, and the Hundred Years War, to the ideals of the crusades, the building of great cathedrals and the social catastrophe of the Black Death; the cultural worlds of chivalric knights, popular festivals, and new art forms. The chapters show the movement of the centre of gravity in European life from the Mediterranean to the north; and the authors explore the contrast between Byzantine and Renaissance cultures in the south and the new, complex political and social structures of north-west Europe, which by 1300 had the most advanced civilization the world had ever seen.

The Oxford Handbook of Women and Gender in Medieval Europe provides a comprehensive overview of the gender rules encountered in Europe in the period between approximately 500 and 1500 C.E. The essays collected in this volume speak to interpretative challenges common to all fields of women's and gender history - that is, how best to uncover the experiences of ordinary people from archives formed mainly by and about elite males, and how to combine social histories of lived experiences with cultural histories of gendered discourses and identities. The collection focuses on Western Europe in the Middle Ages but offers some consideration of medieval Islam and Byzantium. The Handbook is structured into seven sections: Christian, Jewish, and Muslim thought; law in theory and practice; domestic life and material culture; labour, land, and economy; bodies and sexualities; gender and holiness; and the interplay of continuity and change throughout the medieval period. It contains material from some of the foremost scholars in this field, and it not only serves as the major reference text in medieval and gender studies, but also provides an agenda for future new research.
