Spec's. This manual has over 500 pages. It has step by step instructions in every chapter. Covering both model produced the Station Wagons and tray models.

This is a maintenance and repair manual for the DIY mechanic. The book covers the Mitsubishi Pajero, 1997-2009 models.

A model-based approach to the design and implementation of Computational Sensor Networks (CSNs) is proposed. This high-level paradigm for the development and application of sensor device networks provides a strong scientific computing foundation, as well as the basis for robust software engineering practice. The three major components of this approach include (1) models of phenomena to be monitored, (2) models of sensors and actuators, and (3) models of the sensor network computation. We propose guiding principles to identify the state or structure of the phenomenon being sensed, or of the sensor network itself. This is called computational modeling. These methods are then incorporated into the operational system of the sensor network and adapted to system performance requirements to produce a mapping of the computation onto the system architecture. This is called real-time computational mapping and allows modification of system parameters according to real-time performance measures. This book deals with the development of a mathematical and modular software development framework to achieve computational sensor networks.

Felting is an ancient craft that enjoys an endless variety of forms and uses. Felt Fashion captures the art and sophistication that is possible with handmade felt, while keeping it simple and attainable for anyone to master. Whether it's a collar or an entire dress, each project is irresistible and brings felting to an entirely new level. The author demonstrates several basic felting techniques including: basic wet felting, needle felting, nuno, and punch needle felting. For the more advanced fiber artist and sewer, she provides patterns and instructions for original clothing designs including vests, jackets, and skirts. Felt Fashion is a standout from other felting books for its scope, originality, and its distinct ties to couture.
