Looks at African musical traditions, structures, and instruments in their historic, social, and cultural contexts

The volume in hand deals with modes of inquiry and interpretation broadly organised into sections on theory, and historical and creative studies. The section on theoretical issues comprises papers on: the problem of meaning in African music; musicology and African music; the juncture of the social and the musical; integrating objectivity and experience in ethnomusicological studies; the aesthetic dimension in ethnomusicological studies; universal perspectives in ethnomusicology; and contextual strategies of inquiry and systematisation. The section on creative and historical topics covers the following: the history of music in African culture; history and the organization of music in West Africa; historical evidence in Ga religious music; processes of differentiation and interdependency in African music; African musical roots in the Americas; and developing contemporary idioms out of traditional music.

A comprehensive presentation and analysis of the diverse musical traditions of Africa.

The world of Sub-Saharan African music is immensely rich and diverse, containing a plethora of repertoires and traditions. In *The African Imagination in Music*, renowned music scholar Kofi Agawu offers an introduction to the major dimensions of this music and the values upon which it rests. Agawu leads his readers through an exploration of the traditions, structural elements, instruments, and performative techniques that characterize the music. In sections that focus upon rhythm, melody, form, and harmony, the essential parts of African music come into relief. While traditional music, the backbone of Africa's musical thinking, receives the most attention, Agawu also supplies insights into popular and art music in order to demonstrate the breadth of the African musical imagination. Close readings of a variety of songs, including an Ewe dirge, an Aka children's song, and Fela's 'Suffering and Smiling' supplement the broader discussion. *The African Imagination in Music* foregrounds a hitherto under-reported legacy of recordings and insists on the necessity of experiencing music as sound in order to appreciate and understand it fully. Accordingly, a Companion Website features important examples of the music discussed in detail in the book. Accessibly and engagingly written for a general audience, *The African Imagination in Music* is poised to renew interest in Black African music and to engender discussion of its creative underpinnings by Africanists, ethnomusicologists, music theorists and musicologists.

Discourses in African Musicology: J.H. Kwabena Nketia Festschrift highlights the proceedings of a 2011 conference at the University of Ghana in honor of Professor J.H. Kwabena Nketia on his 90th birthday. Professor Nketia was instrumental in shaping the field of ethnomusicology and providing the foundation for an African Musicology. The conference gave scholars and performers an occasion to explore the multi-faceted subject of African music studies, and provided its many attendees the opportunity to extend the scholarly discourse on African music.

The aim of this book is to stimulate debate by offering a critique of discourse about African music. Who writes about African music, how, and why? What assumptions and prejudices influence the presentation of ethnographic data? Even the term "African music" suggests there is an agreed-upon meaning, but African music signifies differently to different people. This book also poses the question then, "What is African music?" Agawu offers a new and provocative look at the history of African music scholarship that will resonate with students of ethnomusicology and post-colonial studies. He offers an alternative "Afro-centric" means of understanding African music, and in doing so, illuminates a different mode of creativity beyond the usual provenance of Western criticism. This book will undoubtedly inspire heated debate--and new thinking--among musicologists,
