National Geographic Maps' new Scotland wall map is one of the largest and most detailed maps available. This classic style wall map contains National Geographic's world recognized proprietary fonts, and bright easy-to-read colors. Scotland is also available in our highly popular Executive style which features a more subdued, antique-inspired color palette. Scotland classic is ideal for those researching their ancestry, a perfect tool for business or educational reference, and a beautiful addition to any decor. Shown on the map are hundreds of named places including primary and secondary towns, counties, political boundaries, infrastructure, and selected historical sites. Map includes Scotland in its entirety including the Highlands, Southern Uplands, Isle of Skye, Outer Hebrides, Inner Hebrides, Orkney Islands and the Shetland Islands (shown in an inset map). The nine political council areas of Scotland are also clearly identified. Map is printed on premium quality paper stock, rolled, and packaged in a clear, hard plastic tube. Map Details: Map measures 30" x 36" (Portrait orientation) Map scale: 1:650,000 (1" = 10.3 miles) Albers Conic Equal-Area Projection Copyright 2010"Map Scale = 1:650,000Sheet Size = 30" x 36""

A popular series of guidebooks for the modern-day traveler offering information on cities and countries around the world continues, presenting up-to-date backgrounds and descriptions, detailed maps, hundreds of photographs, and much more, including walking and driving tours, visitor information directories, and cultural sidebars.

It's the 10th anniversary of the world's best-selling almanac for kids! This year the Almanac features all-new content, interviews with explorers in each chapter, a special look at what was going on in the world when the first National Geographic Kids Almanac came out 10 years ago, plus the results of the 2019 Almanac Challenge and a new Challenge for kids who want to get involved with helping our planet. Kids can have fun keeping up with our quickly changing world with the New York Times best-selling almanac, packed with incredible photos, tons of fun facts, crafts, activities, and fascinating features about animals, science, nature, technology, conservation, and more. There's a whole chapter full of fun and games, including activities, jokes, and comics. Practical reference material, including fast facts and maps of every country, has been fully updated. Homework help on key topics is sprinkled throughout the book.

Beautifully illustrated, this penetrating book offers a sweeping view of humanity from prehistory to the modern day, presented in a unique time-line format. Sweeping but succinct, this comprehensive reference presents all of world history in a browsable format featuring more than three dozen maps, along with hundreds of photographs and illustrations. From the dawn of humankind to today's global complexities, this book provides a compelling reminder that history is unfolding all around us. The epic story of humanity on all seven continents is explored through a unique design that combines concise essays with expansive time lines that invite deeper reading on milestone moments, explained within the broader context of the era. The final chapter highlights such recent events as SpaceX's heavy rocket launch, the restoration of U.S./Cuba relations, and the historical trends that were the precursors to the state of our world today. Informative and richly illustrated, this authoritative take on world history will be a compelling reference you'll turn to again and again.

Filled with more than 350 images from National Geographic, 100 Dives of a Lifetime provides the ultimate bucket list for ardent scuba divers and aspirational travelers alike. From diving with manta rays at night in Kona, Hawaii, and swimming with hammerheads of Cocos Island in Costa Rica to exploring caves in Belize's Lighthouse Atoll and diving beneath the ice floes of Antarctica, this exquisite inspirational book is filled with beautiful imagery, marine life guides, trusted travel tips, and expert diving advice from world-famous National Geographic divers and explorers like Brian Skerry, Jessica Cramp, and David Doubilet. Organized by diving experience and certification level, each location offers a once-in-a-lifetime opportunity to explore the magic of our world's oceans--from your armchair or with your scuba gear in tow.

Politics took a decisive turn twenty years ago with the birth of the modern Scottish Parliament. People in Scotland want to ' make a difference ' and build a better future. Scotland the Brave? offers both an acute assessment of where we are today and a route map to the future. Editors Gerry Hassan and Simon Barrow have brought together an impressive array of Scottish and international voices to cover concerns including the economy, environment, social policy, beliefs, human rights, media and culture. After two decades of significant change, the contributors describes how wealth is created and distributed in Scotland; ways of addressing social divisions and inequality; the needs to respond to the climate emergency, as well as considering challenges to democracy. This book provides powerful, non-partisan visions for the future that indicates how we can rise to challenges of our times and truly become ' Scotland the Brave ' .

Philip's Navigator Scotland is part of a series of Navigator regional road atlases. The Navigator maps provide highly detailed coverage of the region's road network, including minor country lanes and rural tracks. In this atlas, much of the Central Lowlands and Scottish Borders are shown at 1.5 miles to 1 inch, while the rest of Scotland is shown at 3 miles to 1 inch. There is an abundance of other detail, including hundreds of individually named farms, houses and hamlets. Also shown are airports, airfields, stations, ferries, canals, marinas, and a wide range of places of interest. There are also useful details of many services that may be needed while travelling, such as tourist information centres. The atlas has a comprehensive index and includes indexed town plans of major regional centres. The front of the atlas contains a 15-page guide to regional leisure with full details of places of interest, such as castles, houses, cathedrals and museums, plus guides to nature reserves, parks and gardens, and listings of a wide variety of activities from absailing to yachting. The atlas is designed with the leisure user particularly in mind, and is ideal for touring with its large scale and wealth of travel information. The exceptional detail also makes the atlas ideal for local business use, such as planning and delivery driving.

Celebrate the beauty of the world after dark-from starlit skies and glowing city streets to exquisite nocturnal creatures and the wonders that emerge after sunset-with this amazing new book from National Geographic. The world is a different place after dark, and this magnificent photography book illuminates the mesmerizing realm of all things nocturnal. After dark, the light is different; there is an unspoken intimacy; new and different activities occur. And in the natural world, an unseen universe comes alive. Page after page of vivid photos explore the many nuances of night vision--from the sea by moonlight to night markets in Laos to the face of a child lit up by a screen in a darkened room. The range of images is breathtaking- A smoky jazz club. Flowers that bloom only at night. Phosphorescent fish. Lions photographed with infrared cameras. The Eiffel Tower, all lit up. Faces around a campfire. A stadium lit by floodlights. Earth from space. Elegant, sexy, and a little mysterious, this richly illustrated book is a stunning pathway to some of the world's most captivating sights.

Discovering the secrets of animal movement and what they can teach us Insects walk on water, snakes slither, and fish swim. Animals move with astounding grace, speed, and versatility: how do they do it, and what can we learn from them? How to Walk on Water and Climb up Walls takes readers on a wondrous journey into the world of animal motion. From basement labs at MIT to the rain forests of Panama, David Hu shows how animals have adapted and evolved to traverse their environments, taking advantage of physical laws with results that are startling and ingenious. In turn, the latest discoveries about animal mechanics are inspiring scientists to invent robots and devices that move with similar elegance and efficiency. Integrating biology, engineering, physics, and robotics, How to Walk on Water and Climb up Walls demystifies the remarkable secrets behind animal locomotion.
