Neurointerventional radiology is evolving into a rarified and complex field, with more people today training to become neurointerventionalists than ever before. With these developments comes a need for a unified handbook of techniques and essential literature. In *Handbook of Cerebrovascular Disease and Neurointerventional Technique*, Mark Harrigan and John Deveikis present the first practical guide to endovascular methods and provide a viable reference work for neurovascular anatomy and cerebrovascular disease from a neurointerventionalist's perspective. This new gold-standard reference covers the fundamental techniques and core philosophies of Neurointerventional radiology,

while creating a manual that offers structure and standardization to the field. Authoritative and concise, Handbook of Cerebrovascular Disease and Neurointerventional Technique is the must-have work for today's neurosurgeons, neuroradiologists, and interventional radiologists.

Critical Care: A Problem-Based Learning Approach provides a comprehensive review of the dynamic and ever-changing field of critical care. Its problem-based format incorporates a vast pool of practical, ABA board-exam-style multiple-choice questions for self-assessment, and is an ideal resource for exam preparation as well as ongoing clinical education among trainees and clinicians. Each of its 35 case-based chapters is accompanied by questions and answers, accessible online in a full practice exam. The cases presented are unique, as each chapter begins with a case description, usually a compilation of several actual cases; it then branches out through case-based questions, to increasingly complex situations. This structure is designed to create an authentic experience that mirrors that of working through the nuances of a complicated clinical scenario. The discussion sections that follow offer a comprehensive approach to the chapter's subject matter, thus creating a modern, complete, and up-to-date medical review of that topic.

This practical question and answer book covers topics within the field of neurocritical care, including aspects of neurology, neurosurgery, general critical

care, and emergency medicine. Each chapter serves as a standalone test, comprised of approximately 100 questions, and closely mimics the tone and scope of the United Council for Neurologic Subspecialties (UCNS) certification exam in neurocritical care. Rationale and discussion are provided in the answers section at the end of each exam. This practical study guide will help prepare critical care fellows and residents from a variety of backgrounds (including internal medicine, neurology, anesthesiology, and emergency medicine) for the UCNS exam.

The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

The Veterans Benefits Administration (VBA) provides disability compensation to veterans with a service-connected injury, and to receive disability compensation from the Department of Veterans Affairs (VA), a veteran must submit a claim or have a claim submitted on his or her behalf. Evaluation of the Disability Determination Process for Traumatic Brain Injury in Veterans reviews the process by which the VA assesses impairments resulting from traumatic brain injury for purposes of awarding disability compensation. This report also provides

Afghanistan, 1975: Twelve-year-old Amir is desperate to win the local kite-fighting tournament and his loyal friend Hassan promises to help him. But neither of the boys can foresee what will happen to Hassan that afternoon, an event that is to shatter their lives. After the Russians invade and the family is forced to flee to America, Amir realises that one day he must return to Afghanistan under Taliban rule to find the one thing that his new world cannot grant him: redemption.

BASIC SPANISH FOR TEACHERS is a career manual designed to serve those in the teaching professions who seek basic conversational skills in Spanish. Written for use in two-semester or three-quarter courses, it presents everyday situations that teachers could encounter in various work settings (public and private elementary, middle, and high schools) when dealing with Spanish speaking students and parents/guardians in the United States. BASIC SPANISH FOR TEACHERS introduces practical vocabulary, everyday on-the-job situations, and culture notes (Notas culturales) written from a cross-cultural perspective. It provides students with opportunities to apply, in a wide variety of practical contexts, the grammatical structures presented in the corresponding lessons of the Basic Spanish core text.
