was produced from 1958 through the late 1960s.

~~Nissan E engine - Wikipedia~~

The Nissan A14 or later A14S is a 1.4 l (1,397 cc) in-line over head valve four-cylinder 4-stroke gasoline engine from Nissan A-family. The engine was manufactured by Nissan Motor Company from 1975 through 2008. The A14 engine is the most common A-series engine available in the USA, although in some other markets it is relatively rare due to continued use of A12 engines through 1994.

transaxles, differentials, suspension, steering, brakes, and fuel injection.

For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report
